P.P. Ewald and His Dynamical Theory of X-ray Diffraction Durward W. J. Cruickshank 1992 Paul Ewald's 1916-1917 masterpiece 'On the Foundations of Crystal Optics' describes the selfconsistent interaction of electromagnetic waves with crystals on a molecular level. While astonishing in its detailed predictions for X-ray diffraction, full appreciation of the theory and its utility had to await much later advances in measurement techniques and crystal growth. Concepts introduced in the theory, now known as the Ewald sphere, Ewald summation, and Ewald-Oseen extinction, have become mainstays in diverse areas of modern physics. This memorial volume, with contributions by leading figures in the field, is an affectionate survey of his life, scientific work, and role in the international crystallographic community.

New Directions in Sorption Technology George E. Keller 2013-10-22 New Directions in Sorption Technology focuses on the developments in sorption technology, including sorbents, chromatography, pressure swing adsorption, and bioseparations involving sorption. The selection first offers information on coherence concept; an overview of coherence in the chromatographic movement of surfactant mixtures; and technological maturity of sorption processes and sorbents. The book then ponders on kinetic separation of air by pressure swing adsorption; conception of a new adsorption process for purifying landfill gas at the Kapiteltal Landfill Site in West Germany; and sizing of vacuum pumps for desorption in PSA systems. The manuscript takes a look at the evaluation of macroreticular resins as gas/vapor sorbents to rival active carbons and use of surfactant-enhanced carbon regeneration to remove volatile organics from spent activated carbon. Discussions focus on characterization of pores, development of porous polymers, cleaning, and resin preparation. The novel applications of continuous annular chromatography and chromatographic study of aqueous phase adsorption on activated carbon fiber with bacterial growth are also mentioned. The selection is a valuable source material for chemists and readers interested in sorption technology.

Cognitive Development for Academic Achievement James P. Byrnes 2021-08-24 "This integrative text spotlights what educators need to know about cognitive development across grade levels and content areas. The book concisely reviews developmental neuroscience and theories of learning. It probes such crucial questions as what children are capable of remembering at different ages, what explains differences in effort and persistence, and how intelligence relates to learning. Domain-specific chapters focus on the development of key skills in reading, writing, math, science, and history. Multiple influences on achievement and motivation are explored, including school, family, cultural, and socioeconomic factors. Each chapter concludes with clear instructional implications"--
