Foundational Techniques for Mastering Environment and Character Concept Art Lee Stocks 2026-02-26 This is a comprehensive guide to the process of generating ideas for creating character and environment art. The book shows comprehensive workshops and techniques to embed the fundamentals of designing characters and environments for games and film. The underlying process is explained and demonstrated to give a straightforward approach that anyone can use. Using these processes, you will be able to produce designs that are straight out of your imagination. This book teaches you how to use your imagination to design characters and environments. As well as evolving these ideas through the various stages of ideation, the book

covers both environment and character workflows. The book is accompanied by a series of videos breaking down the process of research and creation, as well as additional exercises and breakdowns of good workflow for readers to follow along with as they develop their skills. This book will be of great interest to anyone looking to gain a grounding in the theory and practice of concept art for character and environments. It will be particularly useful for students on Game Art courses.

The Realities of 'Reality' - Part III: Impacts of Speed and Time Optimization on Reality Fritz Dufour, MBA, DESS 2019-08-28 The main

theme of this book is the impacts of speed and time optimization on reality, or more precisely on our modern society. But first, it sets the background by exploring the physics behind the concepts of speed and time, how they came about, how we became aware of them, and how did the new world of speed emerge, and why does it seem to be inescapable? It explores the speed of light and the speed of sound by linking them to our environment. It introduces the notion of Arrow of time or entropy, which grows from the past to the present, is expected to keep growing in the future, and hypothesizes that this is perhaps why our craving for speed and time optimization is here to stay with no end in sight. An important point discussed is that because of memories and experiences, people may choose to live either in the past, present, or future, which leads to the notions of presentism and eternalism. The book argues that while for presentists only the present is real, for eternalists both the past, present, and future are

equally real. The book makes the case about speed and time optimization as a legacy of modernity by laying out the differences between modernism, modernization, and modernity itself. It shows how modernity is all about the now or the present, rather than the past and, how, as such, it's all about the new. So then, the changes that are now happening in our modern world can be traced back to a segment of history that dates back to the beginning of modernity, that is, which began with the Protestant Reformation and, is now rapidly approaching closure in the world of today's extreme finance. It argues about the technological implications of speed and time in the 21st century. It shows how technology has become an integral part of human existence and that it is inconceivable one can even think of escaping it. This Part III of the series shows the link between high-speed trading and faster connectivity and faster computers. It shows how, thanks to the Internet, information became freely accessible and is

spreading faster and faster. It shows how supercomputers not only allow people to address the biggest and most complex problems, they also allow people to solve problems faster, even those that could fit on servers or clusters of PCs. This rapid time to solution is critical in some aspects of emergency preparedness and national defense, where the solutions produced are only valuable if they can be acted on in a timely manner. Finally, the social and psychological implications of speed and time in the 21st century are also addressed by considering the upside and the downside of moving fast, meaning leading a fast-paced life. The argument presented in the book is based on the analysis and the importance of stress in our daily lives and also explains the notion of chronobiology. Our biological clocks drive our circadian rhythms. An interesting point is that blind people may not perceive time the same way as the non-blind. Furthermore, the book shows how we perceive time differently as we age compared

to when we were young. It also makes the case for the perception of time in dreams and in real life. Speed and time optimization may be deceiving, according to this Part III of the series. This can be proven by questions such as, (1) Is going over the speed limit really worth it? and (2) Is the saying “Slow down to go faster” a paradox?

Transnationalism in East and Southeast

Asian Comics Art John A. Lent 2022-10-03 This book explores various aspects of transnationalism and comics art in six East Asian and seven Southeast Asian countries/territories. The 14 richly illustrated chapters embrace comics, cartoons, and animation relative to offshore production, transnational ownership, multinational collaboration, border crossings of comics art creators and characters, expansion of

overseas markets, cartoonists in political exile, colonial underpinnings, adaptation of foreign styles and formats, representation of other cultures, and more. Using case studies, historical accounts, descriptive overviews, individual artists' profiles, and representational analyses, and fascinatingly told through techniques as document use, interviews, observation, and textual analyses, the end result is a thorough, interesting, and compact volume on transnationalism and comics art in East and Southeast Asia.

Pacific Graphics '99 1999 Annotation Seoul, Korea hosted the Pacific Graphics 99 Conference, a major Asian forum in the field. Culled from 81 submissions are 30 papers, as well as three extended abstracts for the keynote address and two invited talks. The keynoter, T. Kunii of Hosei U., Japan, frames the science of computer graphics. Session papers address: rendering, computer animation, geometric computation, swept volume, geometric compression, visualization, subdivision surfaces, surface reconstruction, virtual reality, geometric modeling, and geometric processing. Invited papers are on opportunities for subdivision-based multiresolution modeling, and modeling

and rendering methods of clouds. Color plates (17 pages worth) enliven the proceedings. Future conferences are planned for Hong Kong (2000) and China (2001). Lacks a subject index. Annotation copyrighted by Book News, Inc., Portland, OR.

Creative Convergence James Hutson
2023-11-14 Embark on a journey that transcends the boundaries of art and technology in the groundbreaking realm of Creative Convergence: The AI Renaissance in Art and Design. This isn't just another book on art and technology- it's a journey that sparks curiosity, fuels innovation, and challenges traditional artistic boundaries. Discover the power of generative Artificial Intelligence (AI) as it melds with human expression, propelling artistry into uncharted territories and redefining traditional notions of both originality and creativity. The text is not just about art or AI; it is about the fusion of both, catalyzing a creative revolution that challenges previous assumptions about human-machine

collaboration and how ideation, conceptualization, process and execution are radically rethought. Have you ever wondered how/will AI revolutionize training, education and execution in art and design? Delve into this captivating treatment that contextualizes the disruptions we are experiencing today in the technological innovations and artistic responses and integrations of the past five hundred years. Human creativity has always struggled against technological advance, but ultimately integrated and redefined what "art" is in each era. As such, you will see how AI can be incorporated in various artistic disciplines in this study. Explore real-world case studies that showcase AI's practical impact on 3D design, drawing, digital art, and even web design. The book also addresses the controversial question: Can AI be a co-creator in the creative and artistic process, even assisting in creating an original, signature style? Brace yourself for revelations that will challenge your perceptions of traditional

artistry.

Doug Chiang: The Cinematic Legacy (Volume I) & The Star Wars Legacy (Volume II)

Alexandre Poncet 2025-12-02 A two-volume, 800-page, deluxe slipcased celebration of Academy Award-winning artist and designer Doug Chiang, LucasFilm's senior vice president and executive design director One of the most influential figures in crafting the visual language of Star Wars, Doug Chiang first joined forces with Lucasfilm for Star Wars: The Phantom Menace and has supervised or contributed to the visuals for Attack of the Clones, The Force Awakens, Galaxy's Edge, Rogue One: A Star Wars Story, The Last Jedi, Solo: A Star Wars Story, The Rise of Skywalker, and the Disney+ Star Wars television series The Mandalorian. Chiang's impact on Star Wars, documented in full in the Star Wars Legacy volume of this monumental monograph, cannot be overstated. From the Naboo N-1 Starfighter to the iconic podracers and innumerable ships, droids, and

creatures in between, no one person has had a greater hand in guiding the look and feel of Star Wars since Ralph McQuarrie. The companion volume in this set, The Cinematic Legacy, is dedicated to Chiang's work prior to his arrival at Lucasfilm and showcases his early work, from student films and commercial work to working at Industrial Light & Magic and creating designs for Back to the Future Part II, Alien 3, T2: Judgment Day, Death Becomes Her, Spawn, The Mask, and Jumanji, among others. Chiang also spent time at Image Movers Digital, where he pushed the boundaries of visual effects with contributions to The Polar Express, Beowulf, and War of the Worlds. Chiang's incredible imagination also expands into his personal work with Robota, a passion project of massive scale whose wide array of creatures, droids, ships, and far-off planets serve as the culmination of his influences and interests. In a career spanning five decades, Chiang has closely collaborated with legendary directors including George

Lucas, Steven Spielberg, Robert Zemeckis, James Cameron, and the Wachowskis, all of which are celebrated in this deluxe two-volume package.
