International GAAP 2008 Ernst & Young LLP 2008-04-14 IFRSs, the standards set by the International Accounting Standards Board (IASB), are complex and sometimes obscure. Understanding their implications and applying them appropriately requires something special...and that is why International GAAP 2008 is the essential tool for anyone applying, auditing, interpreting, regulating, studying and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals, and includes, in every chapter, detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively. International GAAP 2008 is the only globally focused work on IFRSs. It is not constrained by any individual country's legislation or financial reporting regulations, and it ensures an international consistency of approach unavailable elsewhere. It shows how difficult practical issues should be approached in the new complex global world of international financial reporting, where IFRSs have become the accepted financial reporting system in more than 120 countries. This integrated approach provides a unique level of authoritative material for anyone involved in preparing, interpreting or auditing company accounts, for regulators, academic researchers and for all students of accountancy. The International Financial Reporting Group of Ernst & Young includes financial reporting specialists from throughout the world. Complex technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue. International GAAP 2008 is accompanied by numerous worked examples, a comprehensive discussion of the practical issues of the day and the possible alternative solutions available, and hundreds of practical illustrations taken from the actual financial statements of companies that report under IFRSs. The only globally focused work on IFRS giving an international consistency of approach unavailable
