## Change Leadership in

## Emerging Markets Caren

Brenda Scheepers 2020-08-03

Based on neuroscience research, this book presents and demonstrates a 'Ten Enablers' model as a framework to help change leaders successfully lead and manage change. It focuses on the execution of change processes within volatile and challenging emerging markets with high growth potential. The book first presents the organizational development and change research on which the model is based, and discusses the basic neuroscience principles. It then introduces a systematic model of the ten enablers, taking readers through the process of change, from considering the ethos prior to embarking on it,

including engagement of stakeholders, up to the final phase, where change leaders exit the process or the organization. It highlights this circular process through several step-by-step illustrations, supported by examples from emerging markets. Further, it includes neuroscience research and principles to help leaders understand and manage change in themselves and others. This well-researched and practical book is a valuable resource for students and professionals alike.

*The Healing Power of Spirituality [3 volumes]* J. Harold Ellens 2009-12-30 This three-volume set addresses how the role of spirituality and its constructive expressions in various religions--and outside of formal religion--enhances human personality and experience. Theologian and acclaimed scholar J. Harold Ellens now offers a breakthrough work on the positive impact of faith. In *The Healing Power of Spirituality and Religion*, an extraordinary group of scholars discuss the latest scientific research into the connection between belief and psychological and physical

well-being. Each volume of *The Healing Power of Spirituality* focuses on a specific aspect of the scientific exploration of faith and well being: volume one examines the healing power of personal spiritualities like I Ching and Transcendentalism; volume two looks at the subject in the context of Christianity, Judaism, and other world faiths; and volume three explores the psychodynamics of healing spirituality and religion, including the role of biochemical and chemical reactions in heightening psychospiritual apperception. 55 distinguished contributors, representing numerous religious traditions, research disciplines, and psychospiritual perspectives, from North America, Latin America, Africa, Asia, and Europe. Graphic illustrations of brain functions under varied conditions with various electrical and chemical stimuli, as well as a graphic depiction of personal narrative material.

### **Personality-guided Therapy for Depression** Neil R.

Bockian 2006 "Describes a promising new approach to treating individuals with complicated depression for whom progress is painfully slow, elusive, or followed by relapse. The causes and experience of depression are influenced by personality style: Depression experienced by a person with a dependent style, for example, differs markedly from that experienced by someone with an antisocial personality. This volume, drawing insights from major theoretical orientations, demonstrates how psychotherapy can be tailored to patients' varying needs and communication styles. Because treating personality disorders alleviates depression and vice versa, this approach offers new hope for progress in both realms. Using Theodore Millon's personality-guided psychology as a framework, author Neil R. Bockian illuminates how taking personality into account enables psychologists to tailor their interventions and thus improve the prospects for long-

term recovery. For each personality type, the author explores how prevalent depression is; what promotes and maintains it; how psychological, biological, and social factors contribute to it; and the role of medications and of therapist reactions to the patient. This groundbreaking book offers practitioners, researchers, and students a framework for understanding how personality factors increase vulnerability to depression or help buffer against it"--Jacket.
