**Innovative ICT Industrial Architecture in East Asia** Hitoshi Hirakawa 2016-11-21 This book aims to shed light on the potentially innovative ICT (information and communication technology) architectures from an East Asian regional perspective. The business environment brought about by the development of ICT intensified global competition and caused dramatic changes in the industrial architecture. Firms that are involved in manufacturing and maintenance of ICT hardware and that offer services for software development are continuously being created, giving rise to the provision of new and diverse services to an increasingly growing East Asian regional market. Such industrial activities are advancing the shift from an old to a new industrial architecture. Some parts of emerging economies have grasped this edge on economic globalization and informatization and have adopted business models that enable them to enter the world economy. Entering this century, China, the Philippines, and Vietnam in East Asia have been rapidly expanding their ICT-BPO (Business Process Outsourcing) businesses as destinations of offshoring of service activities by firms in the advanced economies, following India's example. Policy makers and firms in those countries are also meeting the challenge of catching up with advanced economies through the development of such industries. It has enabled those economies to exploit new possibilities of further development, which may mean a new stage of manufacturing cum services in an ICT- and knowledge-based economy.

*Intertwined: Transpacific, Transcultural Philippines* Florina H.

Capistrano-Baker 2022-12-08 This book is published in conjunction with *Intertwined: Transpacific, Transcultural Philippines*, Ayala Museum's inaugural exhibition for its newly renovated space opened in 2021. It is authored by the exhibition curator Florina H. Capistrano-Baker, Ph.D. and features essays by contributing scholars and field experts—Sandra Castro; Michael F. Manalo, M.Arch; Maria Cristina Martinez-Juan, Ph.D.; and Iván Valdez-Bubnov, Ph.D. *Intertwined* provides important scholarship on Filipino heritage and transpacific studies. The publication also serves as the catalogue of the exhibition. The exhibition and its joint publication open up visual and verbal conversations on the complexities and contradictions of Filipino art and identity. By illuminating the Filipino's transcultural heritage resulting from pre- and post-colonial maritime exchanges with diverse cultures in Asia, America, and Europe, Filipinos can gain a better understanding of our culture and take pride in the excellence we've shown throughout history in the arts, diplomacy, entrepreneurship, and the global economy.

**The World of Child Labor** Hugh D Hindman 2014-12-18 "The World of Child Labor" details both the current and historical state of child labor in each region of the world, focusing on its causes, consequences, and cures. Child labor remains a problem of immense social and economic proportions throughout the developing world, and there is a global movement underway to do away with it. Volume editor Hugh D. Hindman

has assembled an international team of leading child labor scholars, researchers, policy-makers, and activists to provide a comprehensive reference with over 220 essays. This volume first provides a current global snapshot with overview essays on the dimensions of the problem and those institutions and organizations combating child labor. Thereafter the organization of the work is regional, covering developed, developing, and less developed regions of the world. The reference goes around the globe to document the contemporary and historical state of child labor within each major region (Africa, Latin and South America, North America, Europe, Middle East, Asia, and Oceania) including country-level accounts for nearly half of the world's nations. Country-level essays for more developed nations include historical material in addition to current issues in child labor. All country-level essays address specific facets of child labor problems, such as industries and occupations in which children commonly work, the national child welfare policy, occupational safety regulations, educational system, and laws, and often highlight significant initiatives against child labor. Current statistical data accompany most country-level essays that include ratifications to UN and ILO conventions, the Human Development Index, human capital indicators, economic indicators, and national child labor surveys conducted by the Statistical Information and Monitoring Program on Child Labor. "The World of Child Labor" is designed to be a self-contained, comprehensive reference for high school, college, and professional researchers. Maps, photos, figures, tables, references, and index are included.
