**Industrial Engineering and Production Management** Martand T Telsang For close to 20 years, "Industrial Engineering and Production Management" has been a successful text for students of Mechanical, Production and Industrial Engineering while also being equally helpful for students of other courses including Management. Divided in 5 parts and 52 chapters, the text combines theory with examples to provide in-depth coverage of the subject.

ICT Diffusion in Developing Countries Ewa Lechman 2015-06-22 This book provides an extensive overview of the diffusion of Information and Communication Technologies (ICTs) in developing countries between 2000 and 2012. It covers issues such as country-specific ICT diffusion patterns, technological substitution and technological convergence. By identifying social, economic and institutional prerequisites and analyzing critical country-specific conditions, the author develops a new approach to explaining the emergence of their technological takeoff. Readers will discover how developing countries are now adopting ICTs, rapidly catching up with the developed world in terms of ICT access and use.

*Organizational Development, Innovation, and Economy 5.0* Elżbieta Jędrych 2024-09-09 This edited collection comprehensively explores Economy 5.0, focusing on critical aspects such as organizational development, intellectual capital, soft agent dynamics, and agility. Through in-depth analysis, real-world case studies, and forward-looking perspectives, the book provides readers with practical insights into the challenges and opportunities that define contemporary organizations and skills that can be applied in different cultural and organizational contexts. The overarching goal is to empower individuals to thrive in the dynamic economic landscape of Economy 5.0 by promoting sustainable practices, fostering future-proof skill sets, encouraging ethical leadership, and inspiring innovative solutions. It addresses issues and

trends that are universally relevant in today's globalized world, offering a multidisciplinary perspective that will make it valuable to researchers, academics, practitioners, and students in the fields of organizational development, management, innovation, sustainability, and ethical leadership.

*12th International Conference on Theory and Application of Soft Computing, Computing with Words and Perception and Artificial Intelligence - ICSCCW-2024* Rafik A. Aliev 2025-11-18 This book covers theoretical trends and practical aspects of soft computing and AI such as intelligent decision-making, control and modeling, deep learning, uncertain computation, natural language processing, and others. Applications in linguistics, education, various fields of business and industry are considered. This book presents the proceedings of the 12th Conference on Theory and Applications Soft Computing, Computing with Words and Perceptions and Artificial Intelligence, ICSCCW-2024, held in Budva, Montenegro, in August 26-27. This book is a useful guide for academics, practitioners, and graduates in fields of soft computing and AI. It allows for increasing of interest in development and applying of these paradigms in various real-life fields.

Electronic Enclosures, Housings and Packages Frank Suli 2018-11-01 *Electronic Enclosures, Housings and Packages* considers the problem of heat management for electronics from an encasement perspective. It addresses enclosures and their applications for industrial electronics, as

well as LED lighting solutions for stationary and mobile markets. The book introduces fundamental concepts and defines dimensions of success in electrical enclosures. Other chapters discuss environmental considerations, shielding, standardization, materials selection, thermal management, product design principles, manufacturing techniques and sustainability. Final chapters focus on business fundamentals by outlining successful technical propositions and potential future directions.

**Green Artificial Intelligence and Industrial Applications (G-AIIA)**

Sarat Chandra Nayak 2025-10-01 This proceeding book explores emerging field of Green AI, which emphasizes innovations to make AI more environmentally sustainable. Green AI seeks to mitigate the environmental impact of AI technologies by streamlining algorithms, enhancing hardware efficiency, and adopting eco-friendly data management practices—all while maintaining the high performance that modern AI systems promise. It addresses the challenges and opportunities associated with reducing AI's energy consumption, lowering carbon emissions, and promoting ethical and responsible AI practices. The book insights into the development of energy-efficient algorithms by design (Green-in-AI) as well as algorithms specifically created to tackle environmental challenges (Green-by-AI). It highlights the potential of Green AI in fostering a more sustainable technological future, which inspires researchers, engineers, and innovators to pursue ideas and solutions that balance technological advancement with environmental stewardship.

operate in industries with rapid technological change and high internationalization environments. This book focuses on the time dimension of international product launches using case studies from Japanese, US and UK firms such as Panasonic, Sony, Motorola and Nortel. Based upon empirical information the book provides insights into theory and better practice in this area.

Handbook of Research on Applied Intelligence for Health and Clinical Informatics Thakare, Anuradha Dheeraj 2021-10-22 Currently, informatics within the field of public health is a developing and growing industry. Clinical informatics are used in direct patient care by supplying medical practitioners with information that can be used to develop a care plan. Intelligent applications in clinical informatics facilitates with the technology-based solutions to analyze data or medical images and help clinicians to retrieve that information. Decision models aid with making complex decisions especially in uncertain situations. The Handbook of Research on Applied Intelligence for Health and Clinical Informatics is a comprehensive reference book that focuses on the study of resources and methods for the management of healthcare infrastructure and information. This book provides insights on how applied intelligence with deep learning, experiential learning, and more will impact healthcare and clinical information processing. The content explores the representation, processing, and communication of clinical information in natural and engineered systems. This book covers a range of topics including applied intelligence, medical imaging, telehealth, and decision support systems, and also looks at technologies and tools used in the detection and diagnosis of medical conditions such as cancers, diabetes, heart disease, lung disease, and prenatal syndromes. It is an essential reference source for diagnosticians, medical professionals, imaging specialists, data specialists, IT consultants, medical technologists, academicians, researchers, industrial experts, scientists, and students.

**Maintenance in Industry 4.0** Tanu Singh, Vinod Patidar, Arvind

Panwar, Urvashi Sugandh 2025-11-04 Data Analytics and Artificial Intelligence for Predictive Maintenance in Industry 4.0 unites data

science, machine learning, IIOT, and AI to enable predictive and prescriptive maintenance across manufacturing, energy, transportation, agriculture, and healthcare. With contributions from leading academics and practitioners, the book bridges foundational principles with cutting-edge industrial case studies ranging from digital twins and anomaly detection to federated learning and secure healthcare analytics. Key Features Explains fundamental concepts of data analytics, AI, and machine learning for predictive maintenance. Integrates IIoT, digital twins, federated learning, and blockchain into industrial maintenance strategies. Demonstrates real-world applications across manufacturing, energy, healthcare, and agriculture sectors. Analyzes optimization techniques, anomaly detection, condition monitoring, and RUL prediction models. Addresses security and ethical issues, including hardware protection and homomorphic encryption for healthcare. Maps future trends and emerging technologies driving predictive maintenance research.

Blockchain for Industry 4.0 Anoop V.S. 2022-12-23 This reference text provides the theoretical foundations, the emergence, and the application areas of Blockchain in an easy-to-understand manner that would be highly helpful for the researchers, academicians, and industry professionals to understand the disruptive potentials of Blockchain. It explains Blockchain concepts related to Industry 4.0, Smart Healthcare, and the Internet of Things (IoT) and explores Smart Contracts and Consensus algorithms. This book will serve as an ideal reference text for graduate students and academic researchers in electrical engineering, electronics and communication engineering, computer engineering, and information technology. This book • Discusses applications of blockchain technology in diverse sectors such as industry 4.0, education, finance, and supply chain. • Provides theoretical concepts, applications, and research advancements in the field of blockchain. • Covers industry 4.0 digitization platform and blockchain for data management in industry 4.0 in a comprehensive manner. • Emphasizes analysis and design of consensus algorithms, fault tolerance, and strategy to choose the correct consensus algorithm. • Introduces security issues in the industrial

internet of things, internet of things, blockchain integration, and blockchain-based applications. The text presents in-depth coverage of theoretical concepts, applications and advances in the field of blockchain technology. This book will be an ideal reference for graduate students and academic researchers in diverse engineering fields such as electrical, electronics and communication, computer, and information technology.
