Eternal Designs Dr. Octavian Caius Obeada
The book explores Biblical creation narratives, portraying humanity as reflections of the divine, and juxtaposes these with scientific theories such as the Big Bang and the emergence of life from primordial conditions. It delves into the Last Universal Common Ancestor (LUCA) concept. It examines various scientific theories on life's origins and the complexities and functions of prokaryotic and eukaryotic cells. The narrative also highlights the mathematical elegance in human anatomy, such as the Golden Ratio and Fibonacci sequences. It investigates the systems that maintain human balance and the marvels of brain functions. Throughout the book, I weave together a tapestry of scientific knowledge and theological inquiry. From the cellular foundations that play vital roles in natural ecosystems to the brain's remarkable capacities for memory and healing, the book presents a holistic view of life's complexity and beauty. It encourages readers to appreciate the harmony between scientific discovery and spiritual understanding, offering profound

insights into our place in the universe and the ongoing interplay between creation and inquiry. The PAPERBACK version can be found on Amazon: <https://amzn.to/446PNJF>

You'll find what to watch out for, what to do about it, and how to protect your heart so you can enjoy the sports you love for years to come. Too much exercise can kill you. The Haywire Heart is the first book to examine heart conditions in athletes. Intended for anyone who competes in endurance sports like cycling, triathlon, running races of all distances, and cross-country skiing, The Haywire Heart presents the evidence that going too hard or too long can damage your heart forever. You'll find what to watch out for, what to do about it, and how to protect your heart so you can enjoy the sports you love for years to come. The Haywire Heart shares the developing research into a group of conditions known as "athlete's heart", starting with a wide-ranging look at the warning signs, symptoms, and how to recognize your potential risk. Leading cardiac electrophysiologist and masters athlete Dr. John Mandrola explores the prevention and treatment of heart conditions in athletes like arrhythmia, atrial fibrillation and flutter, tachycardia, hypertrophy, and coronary artery disease. He reviews new research about exercise intensity and duration, recovery, inflammation and calcification, and the ways athletes inflict lasting harm. These heart problems are appearing with alarming frequency among masters athletes who are pushing their bodies harder than ever in the hope that exercise will keep them healthy and strong into

their senior years. The book is complete with gripping case studies of elite and age-group athletes from journalist Chris Caselike the scary condition that nearly killed cyclist and coauthor Lennard Zinnand includes a frank discussion of exercise addiction and the mental habits that prevent athletes from seeking medical help when they need it. Dr. Mandrola explains why many doctors misdiagnose heart conditions in athletes and offers an invaluable guide on how to talk with your doctor about your condition and its proven treatments. He covers known heart irritants, training and rest modifications, effective medicines, and safe supplements that can reduce the likelihood of heart damage from exercise. Heart conditions affect hardcore athletes as well as those who take up sports seeking better health and weight loss. The Haywire Heart is a groundbreaking and critically important guide to heart care for athletes. By protecting your heart now and watching for the warning signs, you can avoid crippling heart conditions and continue to exercise and compete for years to come.

Phenomenological Ontology of Breathing Petri Berndtson 2023-02-28 This book studies the phenomenological ontology of breathing. It investigates breathing and air as a question of phenomenological philosophy and looks at phenomenological questions concerning respiratory methodology, ontological experience of respiration, respiratory spirituality and respiratory embodiment. Drawing on the ideas of Maurice Merleau-Ponty, Gaston Bachelard, Martin Heidegger, Edmund Husserl, Luce Irigaray and David Kleinberg-Levin, the book argues for the ontological primacy of breathing and develops a new principle of philosophy that the author calls "Silence of Breath, Abyss/Yawn of Air". It asserts that breathing is not a thing- or person-oriented relation but perpetual communication with the immense elemental atmosphere of open and free air. This new phenomenological method of breathing offers readers a chance to begin to wonder, rethink, re-experience and reimagine all questions of life in an innovative and creative way as aerial and respiratory questions of life. Part of the Routledge Critical Perspectives on Breath and Breathing series, the book breaks new ground in phenomenology and phenomenological ontology

by offering a decisive and insightful treatment of breath. It will be indispensable for students and researchers of philosophy, phenomenology and ontology. It will also be of special interest to Merleau-Ponty scholars as it investigates uncharted dimensions of Merleau-Ponty's philosophy.

The Lymphatic System Julie McDowell 2004-08-30 Examines the role and function of the human lymphatic system.
