Heckscher-Ohlin Trade Theory Eli Filip Heckscher 1991 This book presents the corrected and first complete translation from Swedish of Heckscher's 1919 article on foreign trade as well as a translation from Swedish of Ohlin's 1924 Ph.D. dissertation, the main source of the now famous Heckscher-Ohlin theorem.

Heckscher-Ohlin Theory and Individual Attitudes Towards

Globalization Kevin H. O'Rourke 2003 The aim of the paper is to see whether individuals' attitudes towards globalization are consistent with the predictions of Heckscher-Ohlin theory. The theory predicts that the impact of being skilled or unskilled on attitudes towards trade and immigration should depend on a country's skill endowments, with the skilled being less anti-trade and anti-immigration in more skill-abundant countries (here taken to be richer countries) than in more unskilled-labour-abundant countries (here taken to be poorer countries). These predictions are confirmed, using survey data for 24 countries. Being high-skilled is associated with more pro-globalization attitudes in rich countries; while in some of the very poorest countries in the sample being high-skilled has a negative (if statistically insignificant) impact on pro-globalization sentiment. More generally, an interaction term between skills and GDP per capita has a negative impact in regressions explaining anti-globalization sentiment. Furthermore, individuals view protectionism and anti-immigrant policies as complements rather than as substitutes, which is what simple Heckscher-Ohlin theory predicts.

Bertil Ohlin Ronald Findlay 2002 Bertil Ohlin, international trade theorist, winner of the 1977 Nobel Prize in Economics, and leader of the Swedish Liberal Party for more than twenty years, is considered to be the major single influence on the development of international economics in the twentieth century. This volume, celebrating the centennial of Ohlin's birth, examines his life and his influence on modern economic thought. It also contains the first English translation of his licentiate thesis, in which he first set out his theory of international trade.
