Trade Services Directory & Guide 2003

**Proceedings of the XVIII International symposium Symorg 2022 (BOOK OF ABSTRACTS)** Marko Mihić

With 140 contributions by authors from 19 different countries, XVIII International Symposium of Organizational Sciences - SymOrg 2022 successfully sets the high level for future conferences. The topic of SymOrg 2020, "Sustainable Business Management and Digital Transformation: Challenges and Opportunities in the Post-COVID Era", attracted researchers from different institutions, both in Serbia and abroad. This year, more than 300 scholars and practitioners authored and co-authored scientific and research articles that had been accepted for publication in the Book of Abstracts. All the contributions

to the Book of Abstracts are classified into the following 13 key topics: □ Blockchain Technology in Business and Information Systems □ Business Analytics □ Creativity, Innovation and Sustainable Management □ Digital Operations and Logistics Management □ Digital Transformation of Financial Industry □ Digital Transformation of Public Administration □ E-Business Ecosystems □ Evidence-Based Public Policy Making in the Post-COVID Environment □ LEAN Business Systems - Structures, Processes and Models □ Managing Digital Transformation Projects under Discontinuity □ Managing Human Resources in the Post-COVID Era □ Rethinking Marketing and Communication in the Post-COVID Era □ Quality Management and Standardization in Digital Transformation Era. The

participation of numerous domestic and international authors and the diversity of topics justify our efforts to organize the Symposium. As SymOrg is traditionally at the intersection of academy and business, we believe that this year's meeting will bring about many in-depth discussions, contribute to prospective partnerships, and build stronger business and academic networks. We also believe that meeting will contribute to the exchange of knowledge, research results and experience among industry experts, research institutions and faculties, which all share a common interest in contemporary organizational sciences. We are very grateful to our distinguished keynote and plenary speakers: Ana Draskovic, Aleksander Aristovnik, Manuel Mazzara, Basant Agarwa and Priyanka Harjule. Also, special thanks to moderators for organizing the panels and workshops in the fields of higher education, business, supply chain, doctoral research studies and

student engagement and sustainability. The Faculty of Organizational Sciences would like to express its gratitude to the Ministry of Education, Science and Technological Development and all the partners and individuals who have supported and contributed to the organization of the Symposium. We are particularly grateful to the contributors and reviewers who made this issue possible. But above all, we are especially thankful to the authors and presenters for making SymOrg 2022 a success! Belgrade, June 6, 2022 Marko Mihić, Ph.D. Sandra Jednak, Ph.D. Gordana Savić, Ph.D.

Marketing and Supply Chain Management Dimitris Folinas  
2017-09-13 Organizations are now recognizing the importance of demand-supply integration to their growth and success. While marketing and supply chain management are an essential part of any business qualification, it is becoming increasingly essential to understand the need for integration between synergize marketing and SCM. Marketing and Supply Chain Management is among the first to synergize these two disciplines. Its holistic approach provides students with a macro-level understanding of these functions and their symbiotic relationship to one another, and demonstrates how both can be managed synergistically to the benefit of the organization. This bridge-building textbook is ideal for students of marketing, logistics, supply chain management, or procurement who want to understand the

machinations of business at a macro level.

**Handbook of Service Science** Paul P. Maglio  
2010-06-14 As the service sector expands into the global economy, a new science of service is emerging, one that is dedicated to encouraging service innovation by applying scientific understanding, engineering discipline, and management practice to designing, improving, and scaling service systems. Handbook of Service Science takes the first major steps to clarifying the definition, role, and future of this nascent field. Incorporating work by scholars from across the spectrum of service research, the volume presents multidisciplinary perspectives on the nature and

theory of service, on current research and practice in design, operations, delivery, and innovation of service, and on future opportunities and potential of service research. Handbook of Service Science provides a comprehensive reference suitable for a wide-reaching audience including researchers, practitioners, managers, and students who aspire to learn about or to create a deeper scientific foundation for service design and engineering, service experience and marketing, and service management and innovation.

**Decision Sciences** Raghu Nandan Sengupta 2016-11-30  
This handbook is an endeavour to cover many current, relevant, and essential topics related to decision sciences in a scientific manner. Using this handbook, graduate students, researchers, as well as practitioners from engineering, statistics, sociology, economics, etc. will find a new

and refreshing paradigm shift as to how these topics can be put to use beneficially. Starting from the basics to advanced concepts, authors hope to make the readers well aware of the different theoretical and practical ideas, which are the focus of study in decision sciences nowadays. It includes an excellent bibliography/reference/journal list, information about a variety of datasets, illustrated pseudo-codes, and discussion of future trends in research. Covering topics ranging from optimization, networks and games, multi-objective optimization, inventory theory, statistical methods, artificial neural networks, times series analysis, simulation modeling, decision support system, data envelopment analysis, queueing theory, etc., this reference book is an attempt to make this area more meaningful for varied readers. Noteworthy features of this handbook are in-depth coverage of different topics, solved practical examples, unique datasets for a variety of

examples in the areas of decision sciences, in-depth analysis of problems through colored charts, 3D diagrams, and discussions about software.
