

Process Mining Springer

Most of the process is automated. His job is to develop new products and processes. The process was invented in the 19th century. They are made using the most advanced manufacturing processes. To process food or raw materials is to prepare, change, or treat them as part of an industrial operation. Management recognizes it is important to get the process right even if it means delaying the project ... A process can be defined as a series of actions, steps, or operations performed in a systematic manner to achieve a specific goal or outcome. It involves the conversion of inputs into outputs, often following ... The meaning of PROCESS is a series of actions that produce something or that lead to a particular result. How to use process in a sentence. 1. Prepared or converted by a special process: process

cheese. 2. Made by or used in any of several photomechanical or photoengraving processes: a process print. A process is a series of things that happen naturally and result in a biological or chemical change. It occurs in elderly men, apparently as part of the aging process. When raw materials or foods are ... A process is a procedure, something you do in order to achieve a certain result. Some people try to carefully follow all the steps in a process. Other people just wing it. If you are in the process of doing something, you are doing something that takes a certain amount of time to do. I am in the process of buying a new car/house. Process, procedure, proceeding apply to something that goes on or takes place. A process is a series of progressive and interdependent steps by which an end is attained: a chemical process. Process definition: A series of actions, changes, or

functions bringing about a result.
