Composting for Sustainable Agriculture Dinesh K. Maheshwari 2014-10-21 The dramatic worldwide increase in agricultural and industrial productivity has created severe environmental problems. Soil and groundwater reservoirs have been polluted with pesticides, xenobiotics and agro-chemicals. The global consensus to reduce inputs of chemical pesticides and agrochemical fertilizers, which are perceived as being hazardous by some consumers, has provided opportunities for the development of novel, benign sustainable crop management strategies. The future of agriculture depends upon our ability to enhance the productivity without damage to their long-term production potential. One of the strategies is the application of effective microbial products beneficial for both farmers and ecosystems. This kind of approach can ensure both ecological and economic sustainability. Soil microbial populations are immersed in framework of interactions, which are known to affect plant fitness and soil quality. For betterment of life of human being, improved quality and variety of products are formed due to versatile action of different group of microorganisms, Microbes are able to degrade solid waste material into compost which is a mixture of decayed organic matter, manure etc. Incomplete microbial degradation of organic waste where the microbial process varies aerobic to anaerobic form is stated as compost, if added to soil improves plant growth and development. The biological activities and microbial metabolism in the soil contribute to alter its mixture and fertility. Incorporation of organic remain in the form of compost is known to influence favourably the physio-chemical and biological properties of soil. The beneficial activities bestowed upon plants by compost utilization are multifaceted, hence most promising alternatives for achieving sustainable agricultural production. An increased awareness on compost has led to their use in agricultural concern. Contents in the present book will comprised various chapters on the role of beneficial bacteria in the composting process.

The application is depicted to achieve the attainable productivity besides, in disease management and suppressiveness of organisms of phytopathogenic in nature. Significance of the compost elicits certain responses e.g. soil reclamation, soil fertility, soil health and disease management exhibit due to quality compost amendment in soil. It serves as low cost prospective option for sustainable crop production and protection.

**India's Neighbourhood** Shalini Chawla  
2023-11-03 India's neighbourhood has witnessed  
crucial developments in the last decade: complex  
security challenges, looming economic crises,  
socio-political unrest, border clashes, China's  
expanding engagement, India's rising profile,  
and the COVID-19 pandemic. Over the last eight  
years, India has advocated the "Neighbourhood  
First" policy which 'focuses on creating mutually  
beneficial, people-oriented, regional frameworks  
for stability and prosperity'. India's

neighbourhood presents complex dynamics, and  
the challenges demand attention and serious  
consideration in its policy options. The versatile  
neighbourhood also offers opportunities for  
India to extend cooperation at the regional level  
and address common strategic, economic, social  
and security concerns. India's Neighbourhood:  
Challenges and Opportunities with insights of  
leading experts is a timely contribution to  
academia, practitioners, and keen readers. The  
book fills a critical void in the domain of  
neighbourhood studies and comprehensively  
analyses India's bilateral relations with  
Afghanistan, Bangladesh, Bhutan, China, Iran,  
the Maldives, Myanmar, Nepal, Pakistan, and Sri  
Lanka. The book assesses the traditional security  
challenges like terrorism, examines crucial non-  
traditional security issues (hydro-politics and  
climate change), scans the emerging dynamics  
of rare earth elements and evaluates the wider  
possibilities of India's role in stirring regional  
cooperation in these key areas. Print edition not
