Motorcycle Road & Racing Chassis Keith Noakes
2015-10-15 This book is an account of the
companies and individuals, who have played a
major part in the design and advancement of
motorcycle frame (chassis) performance. These
independent companies began to spring up in
the early postwar years, when motorcycle racing

began to take place again. Due to the lack of
available factory machines and the urge to
improve performance of the now aged
equipment, riders began to build their own
frames around whatever engines were available.
Success brought recognition, and people were
soon wanting to buy winning machines, so
fledgling companies began to spring up to satisfy
the growing demand for custom chassis. Some of
these companies soon began to grow, and others
appeared in various European countries over the
next few years. The state-of-the-art hand built
frames were becoming a must for the discerning
road bike rider, and so the independent
motorcycle frame makers were beginning to put
some designs into production, and a thriving
business was beginning to emerge. In later
years, with such a large choice of factory

engines from around the world, the successful independent chassis manufacturers went from strength to strength and some are now producing highly prized road bikes, whilst building one-off machines as required. As the years have passed, one or two of the independent companies have disappeared, but in many cases their machines have become very collectable classics. The companies still thriving today, as well as producing modern machines with a wide range of engine options, are finding considerable business rebuilding and maintaining machines built in the earlier years. Some of the pioneer builders have become household names to the motorcycle fraternity, and those written about in this book include: Nico Bakker (The Netherlands), Bimota (Italy), Dresda Autos (United Kingdom), Egli (Switzerland), Harris Performance Products (United Kingdom), Hejira racing (United Kingdom), Magni (Italy), Maxton Engineering (United Kingdom), P&M Motorcycles (United

Kingdom), Quasar (United Kingdom), Rickman UK (United Kingdom), Colin Seeley Racing (United Kingdom), Segale (Italy) and Spondon Engineering (United Kingdom). This book charts the history of these innovative companies with full specifications for many chassis, and is extensively illustrated throughout. A must for any motorcycle enthusiast, and a valuable reference for the trade.
