

The Affect Theory Reader

Cognitive Capitalism, Education, and Digital Labor

Michael A. Peters 2011 Cognitive capitalism - sometimes referred to as 'third capitalism,' after mercantilism and industrial capitalism - is an increasingly significant theory, given its focus on the socio-economic changes caused by Internet and Web 2.0 technologies that have transformed the mode of production and the nature of labor. The theory of cognitive capitalism has its origins in French and Italian thinkers, particularly Gilles Deleuze and Felix Guattari's *Capitalism and Schizophrenia*, Michel Foucault's work on the birth of biopower and Michael Hardt and Antonio Negri's *Empire and Multitude*, as well as the Italian Autonomist Marxist movement that had its origins in the Italian operaismo (workerism) of the 1960s. In this collection, leading international scholars explore the significance of cognitive capitalism for education, especially focusing on the question of digital labor.

The Times of Their Lives A. W. R. Whittle 2018 The Times of their Lives' explains how archaeologists can now move away from thinking about history in terms of thousands of years, to periods from one or two centuries down to lifetimes and generations - a little more than two decades. This vastly improved precision comes from the application of Bayesian chronological frameworks for the interpretation of radiocarbon dates. If they do the right things, archaeologists in general and prehistorians in particular need not confine themselves any longer to the long term, which has often been seen as the defining currency of the discipline. Many prehistorians are still uncomfortable with the choice of narratives now available - or have not yet critically rethought old habits. This book will show how temporally much more precise accounts of the past can be achieved, across a broad range of contexts and situations. It offers a series of case studies across much of the continent, to provide much more precise timings of key features and trends in the European Neolithic sequence than are currently available, and to construct much more precise estimates of the duration of events and phenomena. From these there is the possibility to open up new insights into the tempo of change through the detailed study of selected sites and situations across the span of the European Neolithic, from the sixth to the early third millennia cal BC. At stake is our ability to study the lives of Neolithic people everywhere at the scale of lifetimes, something unimaginable even a few years ago.

The Affect Theory Reader 2 Gregory J. Seigworth 2023-09-15 Building on the foundational Affect Theory Reader, this new volume gathers together contemporary scholarship that highlights and interrogates the contemporary state of affect inquiry. Unsettling what might be too readily taken-for-granted assumptions in affect theory, *The Affect Theory Reader 2* extends and challenges how contemporary theories of affect intersect with a wide range of topics and fields that include Black studies, queer and trans theory, Indigenous cosmologies, feminist cultural analysis, psychoanalysis, and media ecologies. It foregrounds vital touchpoints for contemporary studies of affect, from the visceral elements of climate emergency and the sensorial sinews of networked media to the minor feelings entangled with listening, looking, thinking, writing, and teaching otherwise. Tracing affect's resonances with today's most critical debates, *The Affect Theory Reader 2* will reorient and disorient readers to the past, present, and future potentials of affect theory. Border Crossing and Reader Reception in "The Emperor's Babe", "Mr. Loverman" and "Girl, Woman, Other" by Bernardine Evaristo Marnie Hensler 2021-09-21 Master's Thesis from the year 2021 in the subject English Language and Literature Studies - Literature, grade: 1,0, University of Freiburg (English Department), language: English,

abstract: This paper uses both distant and close reading methods to analyse reader reception of Bernardine Evaristo's works "The Emperor's Babe", "Mr. Loverman" and her Booker Award winning publication "Girl, Woman, Other". Through experimental form and style, approachable characters and humorous style of writing, Evaristo successfully draws the contemporary reader into the story world and educates her on the constructedness of cognitive borders and social categorizations (sex, gender, age, race, class et cetera). After the reader crosses the border into the story world, she follows the individual journeys of the fictional characters with the help of mind-reading and narrative empathy and leaves the story world with differences in cognitive processing" followed by effects on "cognition, perception and action. To empirically analyse the educational, border-crossing effect of a literary work that reaches beyond the reading experience, this paper uses reception data from Goodreads in the form of reader profile information and reviews on "The Emperor's Babe", "Mr. Loverman" and "Girl, Woman, Other". After a theoretical introduction to the historic development of the academic interest in both border and (empirical) reception studies, the results section will outline the major findings of a descriptive statistical analysis of the retrieved data for the reception of all novels. Each novel's reception will then be looked at individually through distant and close reading of the respective book's narrative techniques. A discussion section will compare the findings of the distant and close readings of all three books under discussion. The paper will close with a critical summary of the findings in the conclusion and give an outlook on the advantages and opportunities provided by the study of the subversive, border-crossing effects of literature in general. The influence of fiction on a reader's personal life and social cognition has been of interest to academia ever since the beginnings of reader-response criticism and the cognitive turn of the 1980s. Literature, after all, has the power to serve as a springboard for subversive thought, the precursory movement of a transformation of social and cultural structures. Reader response and reception theorists, cognitive literary critics and empirical receptionists have thus been trying to empirically explain the transformative, subversive powers of literature.

The New Media Theory Reader Robert Hassan 2006-09 The study of new media opens up some of the most fascinating issues in contemporary culture, bringing together key readings on new media, what it is, where it came from, how it affects our lives, and how it is managed. It encourages readers to pay attention to the 'new' in new media, as well as consider it as a historical phenomenon.
