Electronics and Optronics Anil K. Maini 2018-03-26 Handbook of Defence Electronics and Optronics Anil K. Maini, Former Director, Laser Science and Technology Centre, India
First complete reference on defence electronics and optronics
Fundamentals, Technologies and Systems
This book provides a complete account of defence electronics and optronics. The content is broadly divided into three categories: topics specific to defence electronics; topics relevant to defence optronics; and topics that have both electronics and optronics counterparts. The book covers each of the topics in their

entirety from fundamentals to advanced concepts, military systems in use and related technologies, thereby leading the reader logically from the operational basics of military systems to involved technologies and battlefield deployment and applications.
Key features: • Covers fundamentals, operational aspects, involved technologies and application potential of a large cross-section of military systems. Discusses emerging technology trends and development and deployment status of next generation military systems wherever applicable in each category of military systems. • Amply illustrated with approximately 1000 diagrams and photographs and around 30 tables. • Includes salient features, technologies and deployment aspects of hundreds of military systems, including: military radios; ground and surveillance

radars; laser range finder and target designators; night visions devices; EW and EO jammers; laser guided munitions; and military communications equipment and satellites. Handbook of Defence Electronics and Optronics is an essential guide for graduate students, R&D scientists, engineers engaged in manufacturing defence equipment and professionals handling the operation and maintenance of these systems in the Armed Forces.

Regis J. Bates 2001-08-15

Translate broadband wireless mumbo-jumbo into clear business terms No guide tackles and clarifies the chaotic acronym-ridden world of

broadband wireless better than Wireless Broadband Handbook. Best-selling telecom author Regis "Bud" Bates has the formula to give you the "instant expertise" you need to compete and win in this rapidly advancing area. He asks the logical, business-based questions that are important to you about this hot new technology, and he provides the answers-- minus the techspeak. You'll find product photos and descriptions and analysis of key systems and options for profitable business, technical, and career decision making. You get lucid information on: * Applications and implementations of technologies * Regulatory and standards developments * Generic pricing and business models * LMDS/MMDS/WAP/GPRS * Wireless IP * GSM around the world * What's going on with WAP * What changes to expect from 3G (and why it is sometimes called UMTS)
