Miller Test Prep's study guide for the ATI TEAS 6 exam is the solution for students who want to maximize their score and minimize study time. Our study guides are carefully designed to provide only that clear and concise information you need. That's precisely why we put "Clear & Concise" on our cover. The standard for the study guide industry is to

"throw in the kitchen sink" when it comes to making a book, meaning you are stuck with hundreds of pages of repetitive information, redundant and confusing examples, and more practice questions than any person could be expected to work through. This results in students feeling overwhelmed, leading to reduced self-confidence, which leads to lower scores! Instead, Miller Test Prep has worked specifically with tutors. Why tutors you ask? Tutors specialize in helping students comprehend information that has already been presented by a teacher. That means they see time and again what students struggle with and what actually works to help them. They specialize in helping students who have previously failed, to succeed. We compiled their decades of experience helping students just like you into this study guide, so you pass the TEAS 6 first time.

Fundamentals for Nursing

Jeanne Wissman 2008 The overall goal of this Assessment Technologies Institute, LLC (ATI) Content Mastery Series module is to provide nursing students with an additional resource for the focused review of "Fundamentals for nursing" content relevant to NCLEX preparation and entry level nursing practice.

A Guide for Developing a Culture of Caring Through Nursing Peer Mentorship Programs

Deborah Kramer 2024-08-19 This book describes in detail how to develop successful programs of nursing mentorship, utilizing concepts of caring that yields a strong, caring body of nurses who will be "nurse thrivers" as they find fulfillment and meaning in their professional commitment and will train others to do the

same. The mentorship program is the ticket to success that many students need to complete their degree program, prevent burnout, pass the nursing NCLEX examination, and remain in the workforce after graduation. The current attrition rate in baccalaureate nursing programs is 25-50%, as is the attrition rate in the first 2 years of employment of new RN's entering the workforce. Burnout is due to a lack of care and support for helping the students navigate the rigor and demands of the nursing program. Creating a community of learners with caring and support creates an environment that fosters academic engagement and success. The unique aspect of this book is its focus on creating a caring environment to support the students; helping them develop caring skills, empathy, resilience and their own self-care; developing the skills for success beyond their educational process into the workforce. This book integrates all patterns of

knowing - personal, aesthetic, empiric and ethical - and provides the missing link of peer mentorship necessary to the development of resilient, emancipated nursing students and graduates capable of working in community with others to establish cultures of care in health care. This is a must have resource for transformation of nursing education in the next century! Foreword by Dr. Margaret McClure.
