**Chemistry** James N. Spencer 2010-12-28  
Chemistry: Structure and Dynamics, 5th Edition emphasises deep understanding rather than comprehensive coverage along with a focus on the development of inquiry and reasoning skills. While most mainstream General Chemistry texts offer a breadth of content coverage, the Spencer author team, in contrast, focuses on depth and student preparation for future studies. The fifth edition is revised in keeping with our commitment to the chemical education community and specifically the POGIL (Process Oriented Guided Inquiry Learning) Project. This text reflects two core principles, first that the

concepts that are covered are fundamental building blocks for understanding chemistry and second, that the concepts should be perceived by the students as being directly applicable to their interests and careers. The authors further provide this "core" coverage using 1 of 3 models; data-driven, chemical theories and student understanding, which allows for a more concrete foundation on which students build conceptual understanding.

*Striking a Balance* Nancy L. Cecil 2017-05-12  
*Striking a Balance* explores a comprehensive program of early literacy instruction through a balanced approach to reading and writing for both enjoyment and information. The fifth

edition retains the special features that adopters have come to appreciate: classroom vignettes, discussion questions, field-based activities, a student website, and study guide. This latest edition offers expanded content on differentiating instruction for diverse learners, including working with English Language Learners and students with special needs. Also new to this edition is greater coverage on integrating state standards with early literacy instruction. The book's practical approach fundamentally demonstrates how children develop authentic literacy skills through a combination of direct strategy instruction and motivating contexts.
