Microengineering of Metals and Ceramics Henry Baltes

2005 Microstructures,
electronics, nanotechnology -
these vast fields of research
are growing together as the
size gap narrows and many
different materials are
combined. Current research,
engineering successes and
newly commercialized products
hint at the immense innovative
potentials and future
applications that open up once
mankind controls shape and
function from the atomic level
right up to the visible world
without any gaps. Continuing
from the previous volume,
authors from three major
competence centres for
microengineering here cover
all aspects of specialized
replication techniques and how
to employ state-of-the-art
technologies for testing and
characterizing micro-scale

components, and illustrate quality control aspects and strategies for automation of production procedures in view of future industrial production and commercialisation.

Advances in Guidance, Navigation and Control

Liang Yan 2023-02-10 This book features the latest theoretical results and techniques in the field of guidance, navigation, and control (GNC) of vehicles and aircrafts. It covers a wide range of topics, including but not limited to, intelligent computing communication and control; new methods of navigation, estimation and tracking; control of multiple moving objects; manned and autonomous unmanned systems; guidance, navigation and control of miniature aircraft; and sensor systems for guidance, navigation and

control etc. Presenting recent advances in the form of illustrations, tables, and text, it also provides detailed information of a number of the studies, to offer readers insights for their own research. In addition, the book addresses fundamental concepts and studies in the development of GNC, making it a valuable resource for both beginners and researchers wanting to further their understanding of guidance, navigation, and control.
