Rehabilitation Medicine for Elderly Patients

Stefano Masiero 2017-09-04 This book clearly explains when and how different rehabilitation techniques should be applied in the aging patient, thereby enabling readers to identify and apply those rehabilitation strategies that will maximize quality of life and functional independence in individual cases. It is specifically designed for ease of consultation and rapid retrieval of the information most relevant to clinical practice. Prominence is given to the benefits of a multidisciplinary approach to rehabilitation, with discussion of a very wide range of aspects of rehabilitation in different disease settings. The breadth of coverage is illustrated by the attention paid to less

commonly addressed topics such as visual and hearing rehabilitation, the role of robotics and 3D imaging techniques, variations in approach among health care systems, and rehabilitation in end-of-life care. The authors are international academic experts in their fields, guaranteeing a high scientific standard throughout. This manual will be an invaluable tool and source of knowledge for geriatricians and physiatrists but will also appeal to a wider range of clinicians, practitioners, and students.

Oral Lichen Planus and Lichenoid Lesions

Gaetano Isola 2023-06-01 This book is an extensive, evidence-based, in-depth review of all aspects of the frequent oral potentially malignant disorder Oral Lichen Planus, from the complex pathogenesis and differential diagnosis to therapeutic management. It highlights the

main discoveries and the limits of current knowledge in the epidemiology, pathogenesis and therapy of this oral disorder, projecting clinicians to the best possible therapeutic management and researchers to the main research fields potentially interesting for the understanding of etiopathogenesis and the establishment of a universally recognized diagnostic criteria. Detailed orientation is provided on oral lichen planus and on the main oral disorders clinically and histologically very similar to it. This work is aimed at clinicians, who are often faced with oral lesions that are not always easily diagnosed, and researchers who are interested in dentistry, oral medicine, and the partly mysterious disease Oral Lichen Planus.

Peyronie's Disease Giorgio Cavallini 2015-04-29
This book aims to provide specialists and practitioners with a reliable source of information on all aspects of Peyronie's disease, which is too often still considered a mysterious condition. The focus is in particular on those aspects of the disease that are most hotly debated, including etiology, risk factors, nosology, natural history and medical therapy. Clear guidance is also provided on surgical techniques, with explanation of why and when to apply plication surgery, corporoplasty and plaque surgery and the best approach to complicated cases. Throughout, strenuous efforts have been made to ensure clarity and simplicity of expression and ease of consultation. While clear international guidelines are lacking, this has allowed the authors to devote much space to personal ideas, conveying the fascinating and sometimes conflicting nature of this field of medicine and, hopefully, stimulating further research.

The Emerging Science of Homeopathy Paolo
Bellavite 2002 In this updated reissue of their
classic Homeopathy: A Frontier in Medical
Science, Italian physicians Paolo Bellavite and
Andrea Signorini thoroughly examine previous
and current literature on the science of
homeopathy in order to discover answers to the
elemental questions about homeopathy. Bellavite
and Signorini engage in a fascinating discussion
of the biophysics of water, biological effects of
electromagnetic fields, chaos theory, and fractals.
Photodynamic Therapy and Biomedical Lasers
Pasquale Spinelli 1992 Nowadays, lasers are
widely used in many areas of medicine: from
diagnostic to therapeutic purposes, from basic to
clinical research. The aim of the above

mentioned Conference was twofold. Firstly, to
provide a forum for an in-depth examination of
the fields of laser applications where thermal
and non-thermal effects in the tissue-light
interaction are exploited. Secondly, to improve
communications between the current
developments of basic research and users of
therapeutical techniques. Approximately 460
participants, representing 30 countries,
attended the Conference. The plenary lectures
and a large fraction of the contributed papers
presented at the above mentioned conference
are collected in this publication. Invited lectures
were given from the most outstanding specialists
in the different fields of experimental and
clinical applications. It is hoped that this
collection of manuscripts represents material
which can be used widely for consultation, and
for the information of anyone involved in medical
applications of lasers and photodynamic therapy.
Living alkaline, living happy: restoring the acid-
base balance of extracellular matrix for the

health of body and mind Andrea Grieco 2021-09
The title of this book might somehow sound as if it is related to a work of psychology, but it is actually a book about health. All physical diseases, chronic pain, fibromyalgia, anxiety, depression, diabetes, obesity and overweight have a very close connection with progressive acidification of the body. Health and wellbeing can exist only when a slightly alkaline extracellular matrix (the entirety of the spaces between our cells) exists. Dr. Andrea Grieco is a specialist in Neurology and Nephrology. He has dedicated his entire professional life to the study of Fibromyalgia, and in this book he clearly and thoroughly explains the relationship between acidosis and all body-mind dysfunctions. This book is founded on three pillars: helping suffering people to regain wellbeing and health, sharing the knowledge and experiences regarding the alkalization of the extracellular matrix, and clarifying a subject that is often surrounded by misinformation and statements

unsupported by scientific thought. Reading will be like a journey within our organism and its deepest functioning mechanisms, where illnesses begin, but also where our self-healing power and our well-being begins.

Age-Related Changes of the Human Eye

Carlo Cavallotti 2008-05-31 Aging research on the human eyes crosses all areas of ophthalmology and also relies upon biological, morphological, physiological, and biochemical tools for its study. In Age-Related Changes of the Human Eye, the authors review all aspects of human eye aging. In addition to descriptions of age-related changes in almost all the structures of the human eyes, the authors also include interesting accounts of personal experiments and data. The ease of use and versatility of this volume makes it an essential tool for students and graduate students as well as post-doctoral and/or professional ophthalmologists. Age-Related Changes of the Human Eye provides the

reader with an exhaustive panorama of what happens during aging in the eye, thus making an important contribution to the understanding of the physiology and pathology of eye diseases.

Il trattamento chiropratico delle patologie del rachide cervicale Marco Oriolo 2012-03-01

Il testo si articola in una introduttiva della disciplina chiropratica ed in una parte scientifica, con i relativi approfondimenti. L'attenzione dell'Autore è rivolta costantemente alla ricerca delle patologie più comuni del rachide cervicale che affliggono la società moderna. Il libro si rivolge in modo particolare ai professionisti delle arti manipolative che intendono avvicinarsi alla scienza chiropratica e in generale a tutti coloro che operano su pazienti affetti da patologie e disturbi di varia natura del sistema neuro muscolo scheletrico (NMS). Il comune lettore apprezzerà il linguaggio semplice e l'uso di una terminologia immediata e facilmente accessibile a tutti, che permetterà di poter rapidamente applicare i concetti e le

procedure terapeutiche descritte.
