The probability is a number between 0 and 1; the larger the probability, the more likely the desired outcome is to occur. For example, tossing a coin twice will yield "head-head", "head-tail", "tail-head", ... How likely something is to happen. Many events can't be predicted with total certainty. The best we can say is how likely they are to happen, using the idea of probability. When a coin is tossed, there are two ... Jan 2, 2025 · We do that by assigning a number to each event (E) called the probability of that event ($P(E)$). The probability of an event is a number between 0 and 1 (inclusive).
