

The Arab Spring End Of Postcolonialism Hamid Dabashi

An Analysis of Hamid Dabashi's Iran Bryan Gibson 2017-07-05 Hamid Dabashi's 2007 *Iran: A People Interrupted* is simultaneously subtle, passionate, polarizing and polemical. A concise account of Iranian history from the early 19th-century onward, Dabashi's book uses his incisive analytical skills as a basis for creating a persuasive argument against the views of Iran that predominate in the West. In Dabashi's view, Western approaches to Iran have been colored time and time again by the assumption that it is somehow trapped between regressive 'tradition,' and progressive 'modernity.' The reality, he argues, is quite the opposite: Iran has its own distinctive ideology of modernity, which is nevertheless opposed to many Western ideals. In order to prove his point, Dabashi draws on a lifetime's experience of literary criticism to analyse the relationship between Iran's intellectual and political elites over two centuries. His analysis provides the key evidence for his reasoning by teasing out the implicit assumptions that underly the texts and people he examines. Looking beneath the surface of the evidence, Dabashi finds - time and time again - the traces of a uniquely Iranian notion of modernity that is quite at odds with its Western counterpart.

[Displacing Theory Through the Global South](#)

Iracema Dulley 2024-04-02 *Displacing Theory Through the Global South* calls for reflection on the historical and geopolitical inequalities that have shaped theorization. It asserts that what appears 'universal' often involves generalizations that flatten the particular. Critiquing the colonialist, imperialist, and Eurocentric perspectives that have historically impacted theorization in general and, more specifically, knowledge production about the so-called Global South, this volume seeks a different form of engagement that moves beyond such strictures. Featuring essays that unsettle distinctions between the general and the particular, it proposes a commitment to expanding notions of

universality, making theorization not only relevant and generative, but ultimately, transformative.

Democracy, Dialectics, and Difference Brian C. Lovato 2015-12-07 It has been nearly two centuries since Marx famously turned Hegel on his head in order to repurpose dialectics as a revolutionary way of thinking about the internal contradictions of our social relations. Despite critiques from post-structuralists, post-colonialists, and others, there has been a resurgence of dialectical thought among political theorists as of late. This resurgence has coincided with a rise in the mention of words like class warfare, socialism, and communism among the general public on the streets of Seattle in 1999, in Cairo's Tahrir Square, in the actions of the Greek anarchists and the Spanish indignados, and in the rallying cry of "we are the 99%" of the Occupy Movement, and in academia. This book explores how it is that dialectical thought might respond to the critiques brought forth by those on the left who are critical of Marxism's universalizing and authoritarian legacy. Brian C. Lovato singles out Ernesto Laclau and Chantal Mouffe as the key interlocutors in this ongoing conversation between Marxism and post-structuralism. Laclau and Mouffe argue that Marxist theory is inherently authoritarian, cannot escape a class-reductionist theory of revolutionary subjectivity, and is bound by a closed Hegelian ontology. Lovato argues the opposite by turning to two heterodox Marxist thinkers, Raya Dunayevskaya and C. L. R. James, in order to construct a radically democratic, dynamic, and open conceptualization of dialectical thought. In doing so, he advances a vision of Marxist theory that might serve as a resource to scholars and activists committed not only to combatting capitalism, but also to fighting against colonialism, patriarchy, white supremacy, and heteronormativity. The writings of Dunayevskaya and James allow for Marxism to become relevant again in these tumultuous early years of the 21st century.

Humanitarian and Military Intervention in

Libya and Syria Aran M. Lewis 2022-12-30

This book explores the contradictions in Britain's humanitarian and military intervention in Libya and Syria, beginning with the Arab spring in 2010. The book assesses the contradictions between the expressed humanitarian intentions of British military interveners and the impact of their actions on the putative beneficiary states. It demonstrates that, as a result of foreign intervention, both Libya and Syria were rendered non-functional as unitary nations and suffered extensive harm to their people and infrastructure. To evaluate the effectiveness and credibility of humanitarian warfare, the author conducts a thematic analysis of debates on Libya and Syria in the House of Commons. The book provides a detailed study of intentions and motives expressed by Members of Parliament, of consequent British state actions and their outcomes, and of MPs' reactions to outcomes. It provides ample evidence of duplicity, insincerity, indifference to harm, and ulterior motives for violence that undermine moral claims and support the argument that, although humanitarian warfare may be possible, the leading Western activist states (Britain, France, and the USA) are poorly qualified to carry it out. Illustrating a systemic failure of strategy and accountability in British foreign policy, this book will be of interest to scholars and graduates of Humanitarian Studies, International Relations and Military Studies.

Literature, Cultural Politics and Counter-

Readings Anindya Sekhar Purakayastha

2021-06-09 This book is an attempt at deconstructive counter-reading or at what Jonathan Dollimore called "creative vandalism" (2018) of existing cultural or literary texts. Deconstruction is a much maligned or a much misunderstood word and for many, it usually bears a pejorative ring. While most would flaunt their familiarity with some of its philosophic jargons, for the majority, it is an area to be dismissed as intellectual obscurity or abstruse 'high theory'. In fact there is a serious dearth of Derrida scholarship because of our collective aversion to Derrida that emanates from our lack of familiarity or engagement with deconstruction theory or with the philosophy of deconstruction.

Norm-deviant reading strategies of deconstruction offer fresh insights and rebellious interpretative possibilities. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

The Arab Spring Hamid Dabashi 2012-05-10

This pioneering explanation of the Arab Spring will define a new era of thinking about the Middle East. In this landmark book, Hamid Dabashi argues that the revolutionary uprisings that have engulfed multiple countries and political climes from Morocco to Iran and from Syria to Yemen, were driven by a 'Delayed Defiance' - a point of rebellion against domestic tyranny and globalized disempowerment alike - that signifies no less than the end of Postcolonialism.

Sketching a new geography of liberation, Dabashi shows how the Arab Spring has altered the geopolitics of the region so radically that we must begin re-imagining the 'the Middle East'. Ultimately, the 'permanent revolutionary mood' Dabashi brilliantly explains has the potential to liberate not only those societies already ignited, but many others through a universal geopolitics of hope.

After the Arab Revolutions Khalil Al Anani

2021-08-29 This book brings together experienced scholars from the region and beyond to cast new light on the challenges facing democratic transitions and democratic stability. Rather than taking refuge in 'context' and 'regional specificity' to excuse failures to unpack Arab politics, the book argues that sound political science should - and could - prove relevant across regions and cultures. This radical critique reclaims and recasts the 'Transition Paradigm', countering the habit of using advanced and successful democratic transitions as a template to be followed in other regions. It argues that the Arab (and broader Middle Eastern) experience has important lessons to offer, even in its failures. For example, it could help to explain the West's recent populist upsurge and other democratic reversals.

Beyond Post-colonialism. The construction of Identities Through Muting and Absenting of the Other. Ahmed Musa 2021-07-19 Essay from the year 2021 in the subject Cultural Studies -

Middle Eastern Studies, grade: 95, , language: English, abstract: This paper is an attempt to trace the absence of the West in the cultural creative modes of knowledge productions that emerged post the Arab social movements in Tunisia and Egypt. Whenever we discuss or approach the subject of the construction of identities in post-colonial studies: the West- who I represent here as the "other"- is largely but not entirely perceived as consolidating against or formulating the identities of the East or the identities of the "Rest". This is evident in not only the revered works of prominent theorists like Edward Said, Homi Bhabha, and Gayatri Spivak, but also in the works of other post-colonial theorists and writers that emerged afterward. However, during the Arab Spring – one of the most solidaristic and transcultural Arab movements that searched for more stable governing models at crossroads of global, regional, and national challenges- creative new forms of formulating identities beyond post-colonial theory emerged, such as; the Arab Spring poetic slogans as creative modes of knowledge production, which moved away from the previous discourse of the post-colonial Arab intellectuals built on a bifurcation identity, and also in tandem revolting the internal regimes of knowledge production. The new forms of cultural productions not only represented moments of self-emergency, social solidarity, and construction of the "self" during traumatic moments, but also in tandem absented and muted the West and East binaries and antithesis of representation.

Government and Politics of the Contemporary Middle East Tareq Y. Ismael 2015-10-05 This exciting new edition of the successful textbook for students of Middle Eastern politics provides a highly relevant and comprehensive introduction to the complexities of a region in constant flux. Combining a thematic framework for examining patterns of politics with individual chapters dedicated to specific countries, the book places the very latest developments and long-standing issues within an historical context, introducing key concepts from comparative politics to further explore the interaction between Middle Eastern history and the region's contemporary political development. Presenting information in an accessible and inclusive

format, the book offers: • Coverage of the historical influence of colonialism and major world powers on the shaping of the modern Middle East. • A detailed examination of the legacy of Islam. • Analysis of the political and social aspects of Middle Eastern life: alienation between state and society, poverty and social inequality, ideological crises and renewal. • Case studies on countries in the Northern Belt (Turkey and Iran); the Fertile Crescent (Iraq, Syria and Lebanon, Israel/Palestine); and those West and East of the Red Sea (Egypt and the members of the Gulf Cooperation Council), moving through an historical examination to close analysis of the most recent developments and their political and social impacts. • Extensive pedagogical features, including original maps and further reading sections, provide essential support for the reader. A key introductory text for students of Middle Eastern politics and history at advanced undergraduate and postgraduate levels, this new edition has been extensively updated to also become a timely and significant reference for policy-makers and any motivated reader.

After Savagery Hamid Dabashi 2025-09-30 Written during a genocide, *After Savagery* reveals the ethical bankruptcy of “Western philosophy” and how it undergirds the erasure of the colonized. The death toll in Gaza continues to rise—a cold, lifeless number representing entire communities crushed under the weight of settler colonialism. What remains of the theories we use to understand our world? With lyrical and lucid fury, Hamid Dabashi exposes the racist roots of Western philosophy, demanding that readers overcome its pernicious phantom of relevance. Rather than perceiving “the West” as giving carte blanche to Israel, Dabashi insists that Israel must be understood as its quintessence. If Israel is the West and the West is Israel, then Palestine is the world and the world is Palestine. Holding to glimmers from revolutionary works of literature and film, Dabashi argues, in grief and love, that the wretched of the earth need poetry after barbarism—and that Palestine is the site of a liberated imagination.
