Steven Mann presents concise tutorials to get users and developers up to speed, and walks through more than 50 procedures, providing clear and accurate steps for each one. Mann's tested, step-by-step procedures include: designing form templates and libraries; using SharePoint form features; incorporating rules and functions; designing pages and views; creating workflows; using external web services data; creating tabbed navigation; providing offline form access; defining master/detail views; displaying and managing lists; dynamically populating repeating tables; tracking

changes, and dozens more. Readers will also find several proven procedures for streamlining administration and troubleshooting.
