Research Methods for Leisure, Recreation and Tourism, 2nd Edition Ercan Sirakaya-Turk 2017-04-13 Describing the fundamental elements of research methods for leisure, recreation and tourism, this new edition of a popular textbook is updated throughout. It covers the measurement of variables, sampling, questionnaire design and evaluation methods, and also a wider discussion of writing proposals,

communicating research findings, cross-cultural research, and the use of new technologies in conducting research. Written by internationally renowned researchers in an accessible style, this book introduces both undergraduate and graduate students to the vital skills they will need to succeed in the leisure, recreation, tourism and hospitality industries.

'Cultural Life', Disability, Inclusion and Citizenship Simon Darcy 2016-02-05 Disability is a complex multidimensional social construct where the type of disability and the level of

support of individuals needs to be considered within leisure provision. In a leisure context, people with a disability often face a multitude of constraints to participation. However, when leisure is possible, the benefits are substantial and worth pursuing. While other marginalised populations have received a great deal of attention across disciplines and in the field of leisure and recreation, disability has received comparatively less attention and generally in isolation to the leisure context. This book concentrates on "disability citizenship in leisure". The chapters focus on examining the leisure lives of people with different types of disability by supporting their leisure endeavours through innovations in technology, service provision and the imagination. Each chapter has a different social setting, involves different groups of people with disability, and challenges conventional wisdom about what is possible when ability is seen, nurtured and, then, flourishing with the opportunities provided.

Rather than leisure being seen in isolation, the context of this book explores leisure as part of everyday lives through valuing Management issues that centre on constraints to sport participation, supply side attributes, participant behaviours, consumption of disability sport, policy implementation, and sponsor congruence. We situate the book in the context of further challenging researchers to think beyond disability as a context in their research and engagement of the person as a citizen in leisure opportunities, as opposed to a disability. This book was published as a special issue of *Annals of Leisure Research*.

[Applied Research and Evaluation Methods in Recreation](#) Diane Blankenship 2010 *Applied Research and Evaluation Methods in Recreation* is the only text that integrates research, evaluation, and basic statistical analysis and links these concepts directly to the field. Using a logical format and accessible language, the book presents students with the foundational

knowledge they need to move through the research process.
