Bridging the gap between nutrition and agriculture in Malawi

Food and Agriculture Organization of the United Nations 2022-03-01 Equipping

agricultural extension and advisory services with nutrition knowledge, competencies and skills is essential to promote nutrition-sensitive agriculture. This report presents the results of an assessment of capacity within agricultural extension and advisory services, undertaken in Malawi with the global capacity needs assessment (GCNA) methodology developed by FAO and GFRAS. The methodology is available online at <https://doi.org/10.4060/cb2069en>

Cooperation Management for Practitioners GIZ GmbH

2015-02-09 The Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH possesses over 30 years of experience in managing

cooperation worldwide. It has now consolidated its comprehensive expertise by publishing this book. The management model Capacity WORKS is designed for everyone actually involved in cooperation: managers, executives, consultants and advisors in business, governance, public administration and the nonprofit sector. It provides a full introduction to the challenges of successful cooperation management, and supplies practitioners with tried and tested approaches. Five success factors (strategy, cooperation, steering structure, processes, and learning & innovation) delineate the various facets that help focus on the objectives and results of complex cooperation systems. The conceptual framework underlying the success factors is clearly set out, and the success factors are supplemented by an extensive toolbox to support practitioners working in these five areas. At the same time the manual gives

readers a broad insight into the world of cooperation management for sustainable development. It includes numerous practical examples, proven contexts of application and glimpses into the work of international cooperation.

Sustainable Development Policy Michael von Hauff
2017-04-21 Sustainable Development Policy: A European Perspective uses a variety of multidisciplinary perspectives to explore the ways in which sustainable infrastructures can play a more prominent and effective role in international development policy. Building on a solid introduction to sustainability and development policy, this

book discusses ways in which viable reform can be promoted through coherent governing, the design of social security systems, education systems and the possibilities of fair trade as an alternative trading concept . Sustainable Development Policy generates a platform on which to encourage constructive dialogue on issues surrounding sustainability in the wake of the global scarcity of natural and economic resources. This edited collection will be of great interest to all students and lecturers of development studies and development policy, as well as researchers from other disciplines looking for an introduction to sustainable development policy and its practical applications.

Quality and Impact in

Global Education Claudia Bergmüller 2021 For several years now, the demand for increased impact orientation has also affected the field of Global Education (GE) / Development Education and Awareness Raising (DEAR). In this context, a vivid discussion

is still ongoing regarding what can be considered an ›impact‹ in GE/DEAR and how these impacts can be analysed. Both questions are dealt with within the scope of the research project ›Impacts and methods of impact monitoring in development education and awareness raising‹, which was financed by the German Federal Ministry for Economic Cooperation and Development (BMZ) and which is to be presented in this volume. Against the backdrop of the empirical findings of this research project, this publication shows which effects can be targeted in the planning and evaluation of GE-/DEAR-projects and which contextual conditions can influence their effectiveness. *Building Capacity* Gabriele Ferrazzi 2012 The Multi Donor Fund for Aceh and Nias (MDF) and the Java Reconstruction Fund (JRF) have played significant roles in the remarkable recovery of Aceh, Nias and Java, following some of the worst disasters in Indonesia in recent years. MDF and the JRF, which is patterned after it, are each considered a highly successful model for post-disaster reconstruction. This paper discusses the value of a phased approach to post-disaster reconstruction as a successful means to manage short-term expectations while delivering long-lasting, results of high quality. The natural disasters of late 2004 and early 2005 left a trail of human loss and destruction in Aceh and Nias. In such a scenario, capacity building efforts related to individual and community level investments yielded large returns. Aceh and Nias have emerged from the reconstruction experience in a better position to address these challenges as a result of the capacity building achieved through the recovery process.

National Evaluation

Capacities 2012 The 2nd International Conference on

National Evaluation Capacities held on 12-14 September 2011 in Johannesburg, South Africa, allowed nearly 100 participants to share experiences on use of evaluation for public policies and programmes from countries with different levels of development of national monitoring and evaluation systems, identifying lessons and constraints in implementing national monitoring and evaluation systems with a focus on use of evaluation, and identifying supply and demand for technical assistance in strengthening institutional capacity for national use of evaluation under the umbrella of South-South and triangular cooperation. This publication presents the major themes related to evaluation use for public policy and programmes, which were touched upon during the discussions.

Sustainable Tourism. Tourism has become a major international industry, with many countries all over the world relying on the income it produces. Its economic advantages as a major source of finance and employment frequently leads to its active promotion by governments and other institutions, independent of the consequences on the environment, ecology and social structure of affected regions. Issues concerned with achieving environmental social and economic sustainability of tourism alongside the governance mechanisms needed to support sustainable tourism are highlighted. Also discussed is how new resources ought to be employed to avoid the errors committed in the past and propose remedial actions when required. This book takes a broad view of this sophisticated and complex industry, and examines the practice of sustainable tourism from global travel trends through to destination and site management. Innovative

solutions, including ecological tourism, as well as cultural initiatives that will lead to better approaches to tourism with the objective of preserving the diversity of our planet. The demands of tourism can contribute to the destruction of the natural and cultural environment upon which it depends. The natural and cultural landscape's capacity to accommodate the local and worldwide effects of tourism and the implications for the human economy and society constitute very important study objectives. To protect the natural and cultural landscape new solutions need to be developed which minimise the adverse effects of tourism. This can be achieved through new strategies involving the active collaboration of society as a whole. Topics covered include: Tourism strategies; Environmental issues; Emergent strategies for tourism development; Community issues; Climate change; Safety and Security; Tourism as a tool of development; Art, architecture

and culture; Heritage tourism; Special interest tourism; Marine and coastal areas tourism; Sport tourism; City tourism; Tourism impact; Tourism and protected area; Rural tourism; Transport and tourism; Education and training; Theme parks; Destination management; Planning and development; Simulation models; Social and physical infrastructure.
