*Nightmares* Patrick McNamara 2008-07-30 "Many examples of nightmares are presented and explained. The content of nightmares is given unusually detailed attention, and the latest science on nightmares is succinctly reviewed. Tables in every chapter summarize existing findings and conclusions on nightmares, and strategies for dealing with nightmares are described. In this novel view, McNamara shows why, rather than being harmful, nightmares can be a helpful adaptive system."--

*Neuroimmunomodulation* Ario

Conti 2000 These proceedings

focus on different areas of

research, with special

emphasis on relating the state

of the art (basic)

neuroimmunomodulation

research to its potential

practical application in specific

fields. Among these, the role of

pro-and anti-inflammatory

cytokines in the central

nervous system; peripheral

mechanisms of

neuroimmunomodulation;

behavioural studies and

immunity; and

neuroimmunomodulation

correlates in autoimmune

disease represent areas of

particular interest. Also

highlighted are studies related

to the role of melatonin as an

immunomodulatory hormone

(an area of explosive growth), as well as the emerging field of neuroendocrine regulation of haematopoiesis. Clinical studies in cancer, allergy, AIDs and other infectious diseases will focus upon neuroimmunomodulation-based mechanisms, and suggest new therapeutic approaches.

Substance P and Neurokinins

Rejean Couture 2012-12-06

Sarajevo was the site of the first international meeting on substance P. It was held in 1961, thirty years after the first report of the discovery of substance P by Von Euler and Gaddum. The proceedings which follow are from a symposium held twenty-five years after the first meeting. These twenty-five years have seen a vast expansion in this field of research. This family of peptides now includes a number of different mammalian and non-

mammalian related peptides.

Beyond the early physiological and pharmacological studies, there is important new

information coming from the full spectrum of disciplines in

the basic medical sciences,

including molecular biology,

which has given us important

insights into the biosynthetic

mechanisms of origin of these

peptides. Montreal was chosen

as the site for the 1986

meeting. The name given to it

was "Sub stance P &

Neurokinins-Montreal '86."

This name was modelled after

the one held in Dublin in 1982,

but neurokinins were added to

acknowledge the broader

family of peptides. The meeting

was held as a Satellite

Symposium of the XXX

International Congress of the

International Union of

Physiological Sciences in

Vancouver. The venue was

McGill University, and the

dates were 21-23 July, 1986.
