Ecocriticism and Italy Serenella Iovino 2016-01-28 Winner of the MLA Aldo and Jeanne Scaglione Prize for Italian Studies 2016 Winner of the American Association for Italian Studies Book Prize 2016 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Written by one of Europe's leading critics, *Ecocriticism and Italy* reads the diverse landscapes of Italy in the cultural imagination. From death in Venice as a literary trope and petrochemical curse, through the volcanoes of Naples to wine, food and environmental violence in Piedmont, Serenella Iovino explores Italy as a text where ecology and imagination meet. Examining cases where justice, society and politics interlace with stories of land and life, pollution and redemption, the book argues that literature, art and criticism are able to transform the unexpressed voices of these suffering worlds into stories of resistance and practices of liberation.

The Bible Interpreted by Women in Early Modern Italy: Promoting Dignity and Agency Erminia Ardissino 2016-03-27 This volume studies initial attempts by Italian women of the early modern period to assert their dignity and gender equality through skillful interpretation of the Bible. It shows how the holy text represented a means to self-awareness and self-valorization, both through the role models of female figures in the New and Old Testaments, and because of the authoritativeness of the divine dictate that sanctioned equality of the genders. Organized into three parts (the origins, biblical models, and the worth of women), this book is devoted to the reception, discussion, and use of biblical texts aimed at gender equality. It proves how these Italian women fought for

their contested value through careful exegesis that revised readings by Patristic and Scholastic theologians to promote the dignity of their gender. There is an evident desire to communicate this new consciousness in order to encourage their female readers to exercise their right to equality and self-determination, allowing them to be agents in their own lives. *The Bible Interpreted by Women in Early Modern Italy* speaks to a large potential readership: it is indispensable for scholars of early modern Europe, and more broadly for scholars and readers looking to better understand the evolution of women's thinking on gender. It is meant to be accessible to non-specialists too – readers curious about the history of women, the Italian Renaissance, religious history, and biblical interpretation. The book offers a novel and much-needed fresh approach to women and gender studies in early modern Europe, focusing on the intersection of gender awareness with devotional and religious writing.

Anatomy and Anatomists in Early Modern Spain Bjørn Okholm Skaarup 2016-03-09 Taking the Vesalian anatomical revolution as its point of departure, this volume charts the apparent rise and fall of anatomy studies within universities in sixteenth-century Spain, focussing particularly on primary sources from 1550 to 1600. In doing so, it both clarifies the Spanish contribution to the field of anatomy and disentangles the distorted political and historiographical viewpoints emerging from previous research. Studies of early modern Iberian science have only been carried out coherently and collaboratively in the last few decades, even though fierce debates on the subject have dominated Spanish historiography for more than two centuries. In the field of anatomy studies, many uninformed and biased readings of archival sources have resulted in a very confused picture of the practice of dissection and the teaching of anatomy in the Iberian Peninsula, in which the highly complex conditions of anatomical research within Spain's national context are often oversimplified. The new empirical

evidence that this book brings to light suggests a far more multifaceted narrative of Iberian Renaissance anatomy than has been presented to date.

Gender, Honor, and Charity in Late Renaissance Florence Philip Gavitt 2011-08-22 This book examines the important social role of charitable institutions for women and children in late Renaissance Florence. Wars, social unrest, disease, and growing economic inequality on the Italian peninsula displaced hundreds of thousands of families during this period. In order to handle the social crises generated by war, competition for social position, and the abandonment of children, a series of private and public initiatives expanded existing charitable institutions and founded new ones. Philip Gavitt's research reveals the important role played by lineage ideology among Florence's elites in the use and manipulation of these charitable institutions in the often futile pursuit of economic and social stability. Considering families of all social levels, he argues that the pursuit of family wealth and prestige often worked at cross-purposes with the survival of the very families it was supposed to preserve.

Village Politics and the Mafia in Sicily Filippo Sabetti 2002-11-14 He suggests that the mafia emerged only in some parts of Sicily and was never a single overarching criminal organization. It arose, in fact, from a self-help tradition that eventually became corrupted and ultimately a

burden on most villagers - land workers and proprietors alike. The local antimafia forces also became a drain on village life and by the middle of the 1950s both the mafia and the antimafia, far from destroying one another, had vanquished themselves. The first study to extend rational choice institutionalism to Italian history and politics, *Village Politics and the Mafia in Sicily* offers an in-depth analysis of the impact of the abolition of feudalism in 1812, the unification of Italy in 1860, and subsequent regime changes on village politics in Sicily. Sabetti details the emergence, evolution, and collapse of a local mafia and antimafia in a historical, "before-after," perspective. Refocusing the study of village politics and the mafia, he also suggests what can happen when those acting for the state regard ordinary people as passive voices in the game of life.

The matter of miracles Helen Hills 2021-02-02 This book investigates baroque architecture through the lens of San Gennaro's miraculously liquefying blood in Naples. This vantage point allows a bracing and thoroughly original rethink of the power of baroque relics and reliquaries. It shows how a focus on miracles produces original interpretations of architecture, sanctity and place which will engage architectural historians everywhere. The matter of the baroque miracle extends into a rigorous engagement with natural history, telluric philosophy, new materialism, theory and philosophy. The study will transform our understanding of baroque art and architecture, sanctity and Naples. Bristling with new archival materials and historical insights, this study lifts the baroque from its previous marginalisation to engage fiercely with materiality and potentiality and thus unleash baroque art and architecture as productive and transformational.
