Quantum Mechanics, Quantum Field Theory R. Mirman 2001

Excision of errors and confusion about quantum mechanics -- and stimulation of thoughtful and adventurous readers are pre-eminent rationales of this entire work; these requiring definitions and analysis of underlying concepts of quantum mechanics, of quantum field theory -- why probability is given by the absolute square, what wavefunctions are and are not and why, and many others -- and also examination of some from the philosophy of science. People's beliefs about quantum mechanics are often just the reverse of what fundamental principles give, seen most spectacularly with the EPR 'paradox'. The puzzles, the mystical, the bizarre, come merely from negligence, from blunders, including the outlandish belief that the universe must be explained using classical physics. Careless, unthinking physicists, and gullible journalists who naively accept their confusion as statements about nature, cause so much misunderstanding and nonsense about physics. Among the many examples considered are the non-existence in quantum mechanics of waves and particles, so of wave-particle duality; the reason that general relativity must be the quantum theory of gravity; the mystery of the cosmological constant: why people believe in it though it would be obvious to a high school student that there cannot be any, it must be zero; the absurdity (and wild incorrectness) of much of the discussion about the vacuum; the required locality of quantum mechanics and the impossibility of action-at-a-distance; and many others. Many blunders, not only about physics, come from abuse of language, the use of words, phrases, sentences without content, with con- notation but no denotation, of names --- quantum mechanics, particles, waves, and so on -- that deceive and misrepresent, of questions that ask nothing. It is not only in physics that answers to questions without meaning smother and hide.

Spotlight Science Keith Johnson 2000 Topic Outlines show parts of the PoS to be covered, the relationship of the topic to aspects of KS2 and KS4 and warn of equipment that may need special preparation time in advance. Topic Maps are provided for students. Lesson Notes relating to each double page spread in the students' book offer objectives, ideas for each lesson, detailed references to the PoS, level descriptions, safety points with references to CLEAPPS HAZCARDS, ICT support, cross-curricular links and equipment lists. Answers to all questions in the students' book are also provided. Additional support material provide: Homework Sheets, Help and Extension Sheets to optimise differentiation (Sc1), Sc1 Skill Sheets, 'Thinking about....' activities to improve integration of CASE activities with Spotlight Science, Revision Quizzes and Checklists, etc. Extra Help Sheets for each topic extend the range of support for Sc1 and Sc2-4. Challenge Sheets for each topic provide a variety of enrichment activities for more able students. They consist of a variety of challenging activities which will present students with opportunities to develop problem-solving, thinking, presentational and interpersonal skills. Technician's Cards include help to prepare lessons, equipment requirements and CLEAPPS HAZCARD references. For more information visit the website at www.spotlightscience.co.uk
