Seven Steps to an Award-Winning School Library Program Ann M. Martin 2012-01-05 This comprehensive book takes the reader through the necessary steps to develop user buy-in and assistance in creating a learner-driven library program. The result? A unique, exemplary school library program that is eligible for national awards. Creating an award-winning school library program involves more than simply following the guidelines and standards available that describe what an exemplary program should accomplish. Effecting the changes necessary is often a process that presents multiple challenges along the way—especially when there is insufficient buy-in to the changes. This updated second edition of *Seven Steps to An Award Winning School Library Program* begins with a description of an existing model school library program and then describes steps that emphasize how to develop user buy-in and assistance in achieving the results of a learner-driven library program. In addition to providing descriptions of detailed actions to perform, advice on working with staff, and background information on change theory, this book also includes practical documents, diagrams, processes, workshop ideas, lesson plans, and tips when filling out applications for awards.

Educational Media and Technology Yearbook 2006 Robert Maribe Branch 2006-03-30 The 2006 volume of the 31 year old *Educational Media and Technology Yearbook* series continues the legacy of its predecessors. It highlights the major trends of the previous year, noting both renewed interest in multicultural perspectives and the ever-growing interest in online learning. It discusses advances in the school and library

media worlds, which continue to reel from budget cuts and hiring freezes. It profiles two outstanding individuals: Michael Molenda (Associate Professor, Instructional Systems Technology, Indiana University, Bloomington) and Ron Oliver (Foundation Professor of Interactive Multimedia, Edith Cowan University, Perth, Western Australia). It also identifies instructional technology-related organizations and graduate programs in North America. The book concludes with a mediagraphy of journals, books, ERIC documents, journal articles, and nonprint resources. As a repository of so much valuable data and information, it is, quite simply, a volume no self-respecting media and technology professional should be without. *Teaching the Use of Books and Libraries* May Ingles 1930 *Practical Marketing for Your School Library* C. L. Mansfield 2025-10-16 Provides librarians and teachers with innovative ideas for producing a marketing plan, newsletters, social media marketing, library programming, and more to position the library as an essential resource.

Standards-Based Lesson Plans for the Busy Elementary School Librarian Joyce Keeling 2017-04-17 This helpful resource provides all-new tested, standard-based lessons accompanied by reproducible handouts and easy-to-follow directions. A new book by Joyce Keeling, an elementary librarian and teacher with more than two decades' experience, *Standards-Based Lesson Plans for the Busy Elementary School Librarian* presents many integrated lesson plans for students in each of the elementary grades, kindergarten through 5th grade. All lessons have been tested and refined in a school setting, and they are specifically written to match the AASL Information Literacy Standards, the McREL Compendium of Standards and Benchmarks, and the Common Core State Standards. In addition to the reproducible lesson plan worksheets, the book offers in-depth discussion of how best to collaborate to teach information literacy within the scope of common elementary school curricula.

Library 101 Claire Gatrell Stephens 2015-08-26 This professional primer provides the blueprint to help you create a school library program, covering all aspects of library management such as budgeting, eBook use, purchasing, and teacher collaboration. Advice and strategies from experts in the field will help you master collection development, library administration, recruitment, and staffing. This handbook is the perfect introduction to school library management for both novice and seasoned professionals. The authors—both experienced school librarians—provide basic guidelines for overseeing an effective library program, practical examples that can be used to implement quality lessons, comprehensive coverage of key topics including daily tasks and human resource management, and ideas for the future of school library management. The provided strategies make setting up and running a program easy for professionals at any level. The second edition includes updated information on the latest trends, terminology, and technologies current in the field. The book is organized into three sections: focusing on daily operations; your role as a teacher collaborator and visionary; and methods for managing a collection. Included resource lists, sidebars, charts, and pictures offer tips and ideas for successfully implementing your plans.
