Mathematics-I Dr. E. Gouthami 2025-11-25 Mathematics forms the backbone of science, engineering, and technology, providing a precise language and powerful tools for modeling, analysis, and problem solving. The subject Mathematics-I is the foundation course for undergraduate students, particularly in engineering, science, and technology programs, where mathematical concepts play a crucial role in understanding and applying core technical subjects. This book, Mathematics-I, is the result of a collaborative effort by a team of experienced academicians and researchers from diverse institutions. Each contributor brings domain expertise, classroom experience, and research insight, ensuring that the content is academically rigorous, pedagogically sound, and aligned with current university curricula. The multi-author approach has enabled the integration of varied perspectives, teaching methodologies, and problem-solving strategies, enriching the overall quality of the book. The primary objective of this book is to present fundamental mathematical concepts—such as calculus, differential equations, linear algebra, and vector analysis—in a clear, systematic, and student-friendly manner. Emphasis has been placed on conceptual clarity, logical development, and step-by-step explanations, enabling learners to build strong analytical skills. Numerous worked examples, illustrative diagrams, and graded exercises have been included to reinforce understanding and enhance problem-solving ability. This textbook is designed to meet the requirements of first-year undergraduate students across engineering and science disciplines and is structured in accordance with Outcome-Based Education (OBE) and NEP-2020 guidelines. Care has been taken to balance theory with applications, helping students appreciate the relevance of mathematical principles in real-world engineering and scientific problems. The authors sincerely hope that this book will serve as a valuable resource for students, a dependable reference for teachers, and a useful guide for self-learners. Constructive suggestions and feedback from readers are most welcome and will be gratefully acknowledged in future editions.

Mathematical Methods for Engineers and Scientists 1 Kwong-Tin Tang 2022-10-25 The topics of this set of student-oriented books are presented in a discursive style that is readable and easy to follow. Numerous clearly stated, completely worked out examples together with carefully selected problem sets with answers are used to enhance students' understanding and manipulative skill. The goal is to help students feel comfortable and confident in using advanced mathematical tools in junior, senior, and beginning graduate courses.

Foundation Mathematics K.A. Stroud 2017-11-17 This complete entry-level textbook from leading authors gives students the confidence they need to succeed in core mathematics skills in preparation for undergraduate courses in engineering or science, or to build skills to support the mathematical elements of other degree courses. Its unique programmed approach takes students through the mathematics they need in a step-by-step fashion with a wealth of examples and exercises. The text demands that students engage with it by asking them to complete steps that they can manage from previous examples or knowledge they have acquired, while carefully introducing new steps. By working with the authors through the examples, students become proficient as they go. By the time they come to trying examples on their own, confidence is high. The text is aimed at students on Foundation courses in engineering, construction, science and computer science, and for all mathematics courses for students of business studies, psychology, and geography.

Engineering 1906

Mathematical Methods for Engineers and Scientists 3 Kwong-Tin Tang 2006-11-30 Pedagogical insights gained through 30 years of teaching applied mathematics led the author to write this set of student oriented books. Topics such as complex analysis, matrix theory, vector and tensor analysis, Fourier analysis, integral transforms, ordinary and partial differential equations are presented in a discursive style that is readable and easy to follow. Numerous examples, completely worked out, together with carefully selected problem sets with answers are used to enhance students' understanding and manipulative skill. The goal is to make students comfortable in using advanced mathematical tools in junior, senior, and beginning graduate courses.

Intelligent Environments 2019 Sofia Ouhbi 2019-08-15 Intelligent Environments (IEs) aim to empower users by enriching their experience, raising their awareness and enhancing their management of their surroundings. The term IE is used to describe the physical spaces where ICT and pervasive technologies are used to achieve specific objectives for the user and/or the environment. The growing IE community, from academia to practitioners, is working on the materialization of IEs driven by the latest technological developments and innovative ideas. This book presents the proceedings of the workshops held in conjunction with the 15th International Conference on Intelligent Environments (IE'19), Rabat, Morocco, 24 - 27 June 2019. The conference focused on the development of advanced intelligent environments, as well as newly emerging and rapidly evolving topics. The workshops included here emphasize multi-disciplinary and transversal aspects of IEs, as well as cutting-edge topics: the 8th International Workshop on the Reliability of Intelligent Environments (WORIE'19); 9th International Workshop on Intelligent Environments Supporting Healthcare and Well-being (WISHWell'19); 5th Symposium on Future Intelligent Educational Environments and Learning (SOFIEE'19); 3rd International Workshop on Intelligent Systems for Agriculture Production and Environment Protection (ISAPEP'19); 3rd International Workshop on Legal Issues in Intelligent Environments (LIIE'19); 1st International Workshop on Intelligent Environments and Buildings (IEB'19); 3rd International Workshop on Citizen-Centric Smart Cities Services (CCSCS'19); and the 4th International Workshop on Smart Sensing Systems (IWSSS'19). The book will be of interest to all those whose work involves the design or application of Intelligent Environments.

Advanced Engineering Mathematics K.A. Stroud 2020-04-12 A long-standing, best-selling, comprehensive textbook covering all the mathematics required on upper level engineering mathematics undergraduate courses. Its unique approach takes you through all the mathematics you need in a step-by-step fashion with a wealth of examples and exercises. The text demands that you engage with it by asking you to complete steps that you should be able to manage from previous examples or knowledge you have acquired, while carefully introducing new steps. By working with the authors through the examples, you become proficient as you go. By the time you come to trying examples on their own, confidence is high. Suitable for undergraduates in second and third year courses on engineering and science degrees.

Further Engineering Mathematics K. A. Stroud 1990 The purpose of this book is essentially to provide a sound second year course in mathematics appropriate to studies leading to BSc Engineering degrees. It is a companion volume to "Engineering Mathematics" which is for the first year. An ELBS edition is available.

Workshop Proceedings of the 11th International Conference on Intelligent Environments D. Preuveneers 2015-07-06 With emerging trends such as the Internet of Things, sensors and actuators are now deployed and connected everywhere to gather information and solve problems, and such systems are expected to be trustworthy, dependable and reliable under all circumstances. But developing intelligent environments which have a degree of common sense is proving to be exceedingly complicated, and we are probably still more than a decade away from sophisticated networked systems which exhibit human-like thought and intelligent behavior. This book presents the proceedings of four workshops and symposia: the 4th International Workshop on Smart Offices and Other Workplaces (SOOW'15); the 4th International Workshop on the Reliability of Intelligent Environments (WoRIE'15); the Symposium on Future Intelligent Educational Environments and Learning 2015 (SOFIEE'15); and the 1st Immersive Learning Research Network Conference (iLRN'15). These formed part of the 11th International Conference on Intelligent Environments, held in Prague, Czech Republic, in July 2015, which focused on the development of advanced, reliable intelligent environments, as well as newly emerging and rapidly evolving topics. This overview of and insight into the latest developments of active researchers in the field will be of interest to all those who follow developments in the world of intelligent environments. *The British Library General Catalogue of Printed Books, 1986 to 1987* British Library 1988
