Multinational Enterprises and the Law Peter Muchlinski 2021-02-18 Multinational Enterprises and the Law is the only comprehensive, contemporary, and interdisciplinary account of the techniques used to regulate multinational enterprises (MNEs) at the national, regional, and multilateral levels. In addition, it considers the effects of corporate self-regulation, and the impact of civil society and community groups upon the development of the legal order in this area. The book has been thoroughly revised and updated for this third edition, making it a definitive reference work for students, researchers, and practitioners of international economic law, business, corporate and commercial law, development studies, and international politics. Split into four parts, the book first deals with the conceptual basis for MNE regulation. It explains the growth of MNEs, their business and legal forms, and the relationship between them and the effects of a globalized economy and society, now increasingly challenged by recently revived nationalist economic policies, upon the evolution of regulatory agendas in the field. In addition, the limits of national and regional jurisdiction over MNE activities are considered, a question that arises throughout the specialized areas of regulation covered in the remainder of the book. Part II covers the main areas of economic regulation, including controls over, and the liberalization of, entry and establishment, tax, company and competition law and the impact of intellectual property rights on technology diffusion and transfer. A specialized chapter on the regulation of multinational banks in the wake of the global financial crisis is new to this edition. Part III introduces the social dimension of MNE regulation covering labour rights, human rights, and environmental issues. Finally, Part IV deals with the contribution of international investment law to MNE regulation

and to the control of investment risks, covering the main provisions found in international investment agreements, their interpretation by international tribunals, the process of investor-state arbitration, and how concerns over these developments are leading to reform proposals.

Dunning 2007 A cast of prestigious international business scholars explores here the emerging challenges and issues facing multinational enterprises. The book integrates the latest theories, thoughts and empirical evidence along with several case studies in international business in the 21st century. It is understood that countries view international business in different ways. The contributors reflect this by offering a wide variety of viewpoints and covering an array of issues, such as foreign direct investment, internationalization, trust and leadership, global education and knowledge transfer. Adding to its value are case studies ranging from American restaurant franchises on the world stage to the influence of the internet on Taiwanese SMEs. The book will be useful to scholars as a research resource, to practitioners as a modern guide and to students of international business as a comprehensive text.

Handbook of International Banking A. W. Mullineux 2003 The Handbook of International Banking provides a clearly accessible source of reference material, covering the main developments that reveal how the internationalization and globalization of banking have developed over recent decades to the present, and analyses the creation of a new global financial architecture. The Handbook is the first of its kind in the area of international banking with contributions from leading specialists in their respective fields, often with remarkable experience in academia or professional practice. The material is provided mainly in the form of self-contained surveys, which trace the main developments in a well-defined topic, together with specific references to journal articles and working papers. Some contributions, however, disseminate new empirical findings especially where competing paradigms are evaluated. The Handbook is divided into four areas of interest. The first deals with the globalization of banking and continues on to banking structures and functions. The authors then focus on banking risks, crises and regulation and finally the evolving international financial architecture. Designed to serve as a source of supplementary reading and inspiration, the Handbook is suited to a range of courses in banking and finance including post-experience and in-house programmes for bankers and other financial services practitioners. This outstanding volume will become essential reference for policymakers, financial practitioners as well as academics and researchers in the field.
