A Trainer'S Guide for Preclinical Courses in Medicine Tabitha Rangara-Omol 2017-05-19 This trainers guide was borne out of indicative results of needs assessments of medical trainers who are subject specialists but have minimal skills in executing curricula into classroom teaching and learning. The learning material in this guide is designed and developed using principles of problem-based learning. It offers practical suggestions on lesson planning, classroom and laboratory activities and presentation templates applicable to competency training. The development of numerous professional and positive life skills can be attributed to problem-based learning. These skills include; communication, professional values and ethics, teamwork, reflective practice, self-regulation, self-responsibility, self-drive, independent and life-long learning. This guide has been designed to incorporate teaching and learning methods that develop these skills.

Human Histology Bertalan Dudas 2023-01-28 Visually engaging and easy to use, *Human Histology: A Text and Atlas for Physicians and Scientists* covers the normal histology of every organ in the human body. This book presents full-page high-definition photomicrographs for organs and tissues, followed by a compact and simple-to-read description of the structures identified on the micrographs, offering a clear, visual understanding of this complex subject. With over 300 outstanding images, this reference is an invaluable resource for every clinical researcher and pathologist in need of easily accessible, relatively simple but detailed enough information on normal histology of different organs systems. Due to its compact, but detailed layout, the volume is an excellent tool for medical board review and can be recommended for medical students and histology course directors. - Contains full-color photomicrographs that clarify microanatomy in detail - Provides easy-to-find comprehensive information on normal histology of different organs systems - Features high-resolution full-page micrographs of organs and tissues surrounded by inserts of magnified parts of the sample
