Enhancing Self-regulation in ASL/English Interpreting Through Scaffolded Instruction and Peer Collaboration Melissa B. Smith-Sherwood 1998

Rethinking the Education of Deaf Students Sue Livingston 1997 Here is a compelling and controversial text which asserts that Deaf students should be treated no differently than non Deaf students. The author, a veteran and practicing teacher, rejects the predominant view of Deaf students as special learners in need of language remediation and repair. Instead, she maintains that for Deaf students as well as their hearing counterparts, the primary educational goal is the making and sharing of

understandings in various subjects. Furthermore, she views this as a process that occurs naturally, concomitantly, and reciprocally with the acquisition of language--regardless of one's hearing ability. Livingston's assertion clashes with conventional Deaf education, which presumes that the wider learning begins after students master a sign system that codifies and reconstructs English. With a cumbersome, orderly, piecemeal, and unnatural approach, this traditional view frequently forces teachers to water down curriculums in an attempt to make English more readily acquired. As a result, Deaf students are deprived of rich and challenging content. Rethinking the Education of Deaf Students offers an alternative and demonstrates how American Sign Language (ASL) and English can coexist in the same classroom, embedded in

the content of what is being taught. Through clear theoretical explanations, field-tested teaching strategies, authentic examples of students' work, lesson plans, and sections on assessment, Livingston suggests ways to help students become educated language users. Her ideas hold enormous implications for those who teach Deaf students, develop school budgets, design programs, and train future teachers. More important, they may hold the key that unlocks the potential of Deaf students of all ages to become voracious readers and accomplished writers.

Teaching English to Deaf and Second-language Students 1986

Reading Practices with Deaf Learners Patricia L. McAnally 2007 This book was written specifically for professors and college students

in teacher training programs for deaf education and for classroom teachers working with deaf and hard-of-hearing learners. It is one of the very few books on the market that focuses entirely on the hearing-impaired. It consists of three sections, each one providing in-depth information on topics critical to the teaching of reading to this specific population. * Section one: "Foundations" - contains chapters dealing with theory and research in such topics as: cognition, reading, language, literary development, vocabulary and comprehension. One chapter on ASL, English, and Reading looks at the research in the area of second-language learners and discusses its application to deaf and hard-of-hearing students. * Section two: "Instructional Management" - deals with instructional management and describes instructional systems and designs. These chapters look at current trends in education and how these trends apply to the education of students who are deaf and hard of hearing. *

Section three: "Applications" - focuses on specific instructional models in reading, writing, and spelling, detailing strategies that have been successfully used with deaf and hard-of-hearing learners. The last chapter in this section discusses assessment, giving information, and examples of both formal and authentic procedures.

Innovative Practices for Teaching Sign

Language Interpreters Cynthia B. Roy 2000

Presents six dynamic teaching practices that treat interpreting as an active process between two languages and cultures, suggesting social interaction, sociolinguistics, and discourse analysis as more appropriate frameworks. The contributors explain how to develop textual coherence skills, use role-play and recall protocols as teaching strategies, and implement

graduation portfolios. Annotation copyrighted by Book News, Inc., Portland, OR

What Really Works With Universal Design for Learning Wendy W. Murawski 2019-03-07 Learn

how to REALLY improve outcomes for all students How do we remove learning barriers

and provide all students with the opportunity to succeed? Written for both general and special educators from grades Pre-K through 12, *What Really Works with Universal Design for Learning* is the how-to guide for implementing aspects of Universal Design Learning (UDL) to help every student be successful. UDL is the design and delivery of curriculum and instruction to meet the needs of all learners by providing them with choices for what and why they are learning and how they will share what they have learned. Calling on a wide-range of expert educators, this resource features an unprecedented breadth of UDL topics, including multiple content areas, pedagogical issues, and other critical topics like executive function, PBIS, and EBD. Reproducible research-based, field-tested tools, practical strategies that are low cost, time efficient, and easy to implement, practices for developing shared leadership and for working with families. Educators want to see each and every student succeed. This teacher-friendly, hands-on

resource shows how UDL can be used to build the flexibility required to meet students' strengths and needs without overwhelming teachers in the process.

Handbook of Reading Disability Research

Anne McGill-Franzen 2010-09-17 Bringing together a wide range of research on reading disabilities, this comprehensive Handbook extends current discussion and thinking beyond a narrowly defined psychometric perspective. Emphasizing that learning to read proficiently is a long-term developmental process involving many interventions of various kinds, all keyed to individual developmental needs, it addresses traditional questions (What is the nature or

causes of reading disabilities? How are reading disabilities assessed? How should reading disabilities be remediated? To what extent is remediation possible?) but from multiple or alternative perspectives. Taking incursions into the broader research literature represented by linguistic and anthropological paradigms, as well as psychological and educational research, the volume is on the front line in exploring the relation of reading disability to learning and language, to poverty and prejudice, and to instruction and schooling. The editors and authors are distinguished scholars with extensive research experience and publication records and numerous honors and awards from professional organizations representing the range of disciplines in the field of reading disabilities. Throughout, their contributions are contextualized within the framework of educators struggling to develop concrete instructional practices that meet the learning needs of the lowest achieving readers.

Essentials of Research Methods for Educators
Anastasia Kitsantas 2023-10-13
Essentials of Research Methods for Educators provides future teachers, specialists, administrators and educational leaders with a textbook and a resource that goes beyond the classroom to use in your career. With a focus on the wide variety of data available to educators and the importance of data literacy for all those involved in education, this book presents research methods in a relatable educational context with a variety of concrete examples. The authors use their expertise in educational psychology to optimize learning. The structure of the book breaks down research into discrete steps with the "Let's See It," "Let's Do It," and "You Do It" steps for each chapter so students feel motivated to complete their research projects. By covering qualitative, quantitative, and mixed methods research, with additional chapters on action

research and program evaluation, students get a complete picture of the current research methods landscape. This highly scaffolded book supports future educational leaders in incorporating research and methods into their work and life.
