The MiG-21 Holger Müller

2019-01-28 This book presents

a detailed look at the design and development of the legendary MiG-21, including its powerplant, armament, upgrades, and variants. The Mikoyan-Gurevich MiG-21 was the standard fighter/interceptor aircraft of the Warsaw Pact and it stood up to its western counterparts for decades. This single-engine, supersonic jet fighter entered service in 1959, and in addition to the Soviet Union, almost every eastern European military operated the Mach 2 fighter, including East Germany (which flew more than 500 aircraft of this type), Poland, Romania, Yugoslavia, and others. With approximately 11,000 of all types built, the MiG-21 has been produced in greater numbers than almost any other combat aircraft in history, and has also seen combat with such countries as Vietnam, China, Syria, Iraq, Angola, and others.

The Encyclopedia of the Arab-Israeli Conflict Spencer C. Tucker 2008-05-12 This exhaustive work offers readers at multiple levels key insights

into the military, political, social, cultural, and religious origins of the Arab-Israeli conflict. The *Encyclopedia of the Arab-Israeli Conflict: A Political, Social, and Military History* is the first comprehensive general reference encompassing all aspects of the contentious Arab-Israeli relationship from biblical times to the present, with an emphasis on the era beginning with World War I. The *Encyclopedia of the Arab-Israeli Conflict* goes beyond simply recapping military engagements. In four volumes, with more than 750 alphabetically organized entries, plus a separate documents volume, it provides a wide-ranging introduction to the distinct yet inextricably linked Arab and Israeli worlds and worldviews, exploring all aspects of the conflict. The objective analysis will help readers understand the dramatic events that have impacted the entire world, from the founding of modern Israel to the building of the Suez Canal; from the Six-Day

War to the Camp David Accords; from the assassinations of Anwar Sadat and Yitzhak Rabin to the rise and fall of Yasser Arafat, the 2006 Palestinian elections, and the Israeli-Hezbollah War in Lebanon.

Mikoyan Gurevich Mig-21 Fishbed - Warbirdtech Gordon Yefim 2007-02 The photos in this edition are black and white. The Mikoyan-Gurevich MiG-21 Fishbed, a lightweight air-combat fighter, is one of the most famous military aircraft in the world. No other warplane has been manufactured in such large numbers (over 10,000 in the Soviet Union and about 2,000 in China and India) since World War II. Nor has any other fighter served with so many air forces (the current count is 56). This global success was the MiG design bureau's fourth in succession in the immediate postwar era. Powered by one Tumansky R-11F-300 rated at 12,675 lb (w/ afterburner), the MiG-21 was easy to maintain, tough in the harshest environments, and very affordable. It was

designed to climb fast to high altitudes, at all heights, and to excel in close combat. This book covers all MiG-21 upgrades and variants, as well as combat and armament specifications. Over 300 photos are used to illustrate the story of the MiG-21. It features technical diagrams and gives a comprehensive development history. Other topics include design, development, structural detail, international production, trials, comparisons, and much more.

The Role of the Fighter & Bomber Christopher Chant 2000 Drawings, photographs, and text describe a variety of fighter and bomber planes, both U.S. and foreign, including Japan's Kawasaki fighters, the Lockheed F-104, Russia's MiGs, Sweden's Saab fighters, German Junkers, and Britain's Harrier.

protect military and production installations from potential raids by American bombers. Built for almost half a century in twenty or so different versions, in four successive generations, the “Fishbed” (its NATO codename) was not only the jet which was built in the largest numbers in the whole of aviation history, but also the aircraft which was built in greatest numbers since the end of the Second World War, all types and all countries included. Used by fifty or so air forces on four of the five continents, the MiG-21 took part in most of the major conflicts during the four last decades, from the Six-Day War in 1967 to the Balkans in 1999. At the present time more than a thousand examples of this fighter, of which a large number were built in China (Shenyang F-7 and J-7) are still in service, with their career continuing thanks to modernization programs for the surviving aircraft which have enabled them to pass cheerfully into the 21st Century.

Excerpt: The Mikoyan MiG-29 (Russian: NATO reporting name: "Fulcrum") is a fourth-generation jet fighter aircraft designed in the Soviet Union for an air superiority role. Developed in the 1970s by the Mikoyan design bureau, it entered service with the Soviet Air Force in 1983, and remains in use by the Russian Air Force as well as in many other nations. The NATO name "Fulcrum" was sometimes unofficially used by Soviet pilots in service. The MiG-29, along with the Sukhoi Su-27, was developed to counter new American fighters such as the McDonnell Douglas F-15 Eagle, and the General Dynamics F-16

Fighting Falcon. In 1969 the existence of the United States Air Force's "F-X" program, which would result in the McDonnell Douglas F-15 Eagle, became public knowledge. At the height of the Cold War, a Soviet response was necessary to avoid the possibility of a new American fighter becoming a serious technological advantage over existing Soviet fighters, thus...

Ideal for high school and college-level readers as well as students attending military academies and general audiences, this encyclopedia covers the details of the Persian Gulf War as well as the long-term consequences and historical lessons learned from this important 20th-century conflict. This encyclopedia provides a rich historical account of the Persian Gulf War, examining the conflict from a holistic perspective that addresses the details of the military operations as well as the social, political, economic, and cultural aspects of the war. The alphabetically arranged entries chart the events of the war, provide cross references and sources for additional study, and identify the most important individuals and groups associated with the conflict. In addition, it includes primary source documents that will provide readers with valuable insights and foster their critical thinking and historical reasoning skills. The Persian Gulf War served as the first live-combat test of much

of the United States' then-new high-tech weaponry. The war also held many lessons about the play of national interests, the process of coalition building, the need for effective communication and coordination, and the role of individuals in shaping history. This book addresses all key battles, the nations involved, strategies employed by both sides, weapon systems used, the role of the media, the role played by women, and environmental and medical issues associated with the conflict.

Mikoyan-Gurevich Mig-21
Theodore Gianna 2023-02-14

The MiG-21 was the first supersonic fighter from the Soviet Union. It was first built in the mid-1950s, around the same time as the US Century Series jet fighters, the F-100, F-101, F-102, F-104, F-105, and F-106. However, the MiG 21 would outlive all those fighters. The three largest MiG factories

in the USSR manufactured the MiG-21s in many variants. The Moscow Gorki plant (no.21) saw the most extensive production; 5,278 units. The second facility, also in Moscow, was the 'Znamya Truda' (Moscow Aircraft Production Association) plant, which produced 3,203 units, and the no. 31 plant in Tbilisi, Georgia, built 1,677 units. Production lasted 27 years, from 1959 until 1986. MiG fighters for internal and export use totaled an amazing 10,158 MiG-21s built, including the last of a great breed, 2,030 MiG-21bis fighters, and 1,133 MiG-21 UM 'Mongol' training versions. It was the most mass-produced supersonic fighter aircraft in aviation history, and it still holds that title. Although the MiG-21 was an excellent jet fighter, one aircraft had its measure, the McDonnell Douglas F-4 Phantom. The air battles that took place between the two rival jets during the long Vietnam conflict are legendary. This book devotes a section on the MiG's operations in the Vietnam War.

Mikoyan-Gurevich MiG-21 Pilot's Flight Operating Instructions Nato 2008-09

The Mikoyan-Gurevich MiG-21 is known in NATO circles as the 'Fishbed'. Designed as a Mach 2.0 interceptor, the plane holds the distinction of being produced in greater numbers than any other jet aircraft. The Fishbed flew in combat in Vietnam, where it held its own against the F-105

Thunderchief. During the 1973 Arab-Israeli War, 17 Israeli aircraft were shot down, for a loss of six Egyptian MiG-21s. The plane also flew in combat in the Indo-Pakistani War of 1971, during the Soviet invasion of Afghanistan, and in Yugoslavia. Today, over 28 of the world's air forces continue to fly MiG-21s. Originally printed by NATO, this English-language handbook provides a glimpse inside the cockpit of this incredible plane. The manual was recently declassified and is here reprinted in book form.
