**The British National Bibliography** Arthur James Wells 2009

No Citizens Here: Global Subjects and Participation in International Law René Urueña 2012-03-23 International legal scholarship has traditionally celebrated the possibility of individuals being considered as subjects of international law. This book challenges that narrative, and reveals hidden

patterns in the way we think about legal subjects in global governance. Building on the notion of a risk society, this book argues that international law creates fragmented subjectivities, whose conflicting identities help perpetuate a certain global loss of sense that is characteristic of our times. An innovative contribution that draws on a wealth of international legal materials (including human rights, EU law, international economic law, and international organizations), this book is useful to those with an interest in international legal theory, new approaches to international law, global constitutionalism, and global administrative law.

N. Gregory Mankiw 2014-05-09 This special edition of Greg Mankiw's intermediate macroeconomics textbook takes the same approach that

made the parent text a bestseller, but with coverage shaped to address fiscal policy, monetary/exchange-rate policy, deficit reduction, and other critical economic issues from the uniquely Canadian perspective. Like Mankiw's *Macroeconomics*, the Canadian edition teaches fundamentals by relating theoretical concepts to big issues and policy debates, but illustrates those ideas and discussions with examples and cases from Canada, as well as research by Canadian economists.

everyday problems: What is the social cost of legislation enforcing below-market prices, minimum wages, milk regulation, and noncompetitive pricing? Why are matinee movies cheaper than nighttime showings? And then there are broader questions: What is the patent system's role in the market for intellectual property rights? How does one think about externalities like airport noise? Is the free market, a regulated solution, or tort law the best way to deliver the "efficient amount of harm" in the workplace? What is the best approach to the question of economic compensation due to a person falsely imprisoned? Along the way, readers learn what economists mean when they talk about sorting, signaling, reputational assets, lemons markets, moral hazard, and adverse selection. They will learn a new vocabulary and a whole new way of thinking about the world they live in, and will be more productive in their professions.

*Schooling for Sustainable Development in Canada and the United States* Rosalyn McKeown 2012-07-26  
Education for sustainable development (ESD) presents an intriguing challenge in developed countries. The very notion of sustainable development may appear to be at cross-purposes with the social and political aims of large industrial economies. Yet, arguably, the residents of wealthy countries may be most in need of new ways of thinking and behaving on an increasingly more fragile and crowded planet. This book presents a collection of essays that capture the depth and diversity of education for sustainable development (ESD) work in formal education in Canada and the United States. Many of the authors are pioneers in the field of ESD, not only in their own countries but internationally. In this book, they share their expertise, lessons learned, and insights into the ongoing success of their work. The essays reflect leading edge

practice, innovation, and depth of experience and provide clear models and strategies for expanding the application and influence of ESD in wealthy countries. The ESD programs described in the book are relevant and culturally appropriate for the specific locally contexts in which they are found but also in the larger context of ESD writ large as a planetary endeavour.
