Russia and The Commonwealth of Independent States 2012 M. Wesley Shoemaker 2012-08-09 Russia and the Commonwealth of Independent States 2011 is a volume in "The World Today Series". Published and updated annually, this series provides both a short historical treatment and an up-to-date look at the various countries of the entire globe. Russia and the Commonwealth of Independent States deals with the twelve independent republics that became members of the Commonwealth of Independent States following the collapse of the Soviet Union in December 1992. The book focuses strongly on recent economic and political developments with shorter sections dealing with foreign policy, the military, religion, education, and specific cultural elements that help to define each republic and differentiate one from the other.

Approximately one-third of the book is devoted to Russia, with shorter sections dealing with Ukraine, Belarus, Moldova, Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. There is also a section dealing with how the Commonwealth of Independent States came into being and how it has evolved since 1992.

Management Information Systems James A. O'Brien 2008 The benchmark text for the syllabus organized by technology (a week on databases, a week on networks, a week on systems development, etc.) taught from a managerial perspective. O'Brien defines technology and then explains how companies use the technology to improve performance. Real world cases finalize the explanation.

Managed By Morons James Lawther 2023-09-04 The antidote to mediocre management: read it and become a better boss. Management would be easy if it weren't for the corporate claptrap that gets in the way, the painful organisational rituals that do nothing for a business's success. SMART goals are not smart, the annual round of target setting is a management power game, and employee performance management is for fools. - If it is such a great idea, why don't you do it at home? Try telling your partner they are "below standard" and highlight their "development opportunities". Imagine how that would play out. You don't need an Executive MBA to be a captain of industry. Nor do you need to climb on the bandwagon of the next big thing. Management by Objectives, Best Practice Benchmarking and the Tao of Transformational Leadership have all been... and gone (though you might need some Artificial Intelligence to sift through all that Big Data). There are easier ways to create flourishing workplaces. James Lawther spent a third of a century in corporate Britain. He has been taken for a ride by leadership

gurus, seduced by technology, fleeced by management consultants and had his fair share of truly dreadful managers. But he learned how to build a thriving organisation along the way. There is no secret sauce, and like all good things, it is simple when you know how. Buy this book and rediscover the obvious. Your customers, employees (and bosses) will love you for it.
