1998 Supplement to the 1991 ISDA Definitions 1998 The 1998 supplement to the 1991 ISDA definitions is an update of certain sections of the 1991 ISDA definitions, which many participants engaging in privately negotiated derivatives transactions incorporate into existing confirmations or other documents. The supplement covers a greater number of currencies and rates than the 1991 ISDA definitions, and updates certain floating rate options to reflect changes in the nature of quotations since 1991. The 1998 supplement is intended for use in confirmations of individual transactions governed by agreements such as the 1992 ISDA master agreements. Includes: Sample form for a letter agreement or telex; Sample form of specific provisions for a swaption; Sample form of specific provisions for a swap transaction to which optional early termination applies; Sample form of specific provisions for a swap transaction to which mandatory early termination applies.

[Modelling Single-name and Multi-name Credit Derivatives](#) Dominic O'Kane 2011-03-08 Modelling Single-name and Multi-name Credit Derivatives presents an up-to-date, comprehensive, accessible and practical guide to the pricing and risk-management of credit derivatives. It is both a detailed introduction to credit derivative modelling and a reference for those who are already practitioners. This book is up-to-date as it covers many of the important developments which have occurred in the credit derivatives market in the past 4-5 years. These include the arrival of the CDS portfolio indices and all of the products based on these indices. In terms of models, this book covers the challenge of modelling single-tranche CDOs in the presence of the correlation skew, as well as the pricing and risk of more recent products such as constant maturity CDS, portfolio swaptions, CDO squareds, credit CPPI and credit CPDOs.

Derivatives and Development Sasha Breger Bush 2012-07-16 Breger Bush argues that derivatives markets work in the development context as engines of inequality and instability, aggravating poverty among those they are purported to help and highlighting some of the dangers of neoliberal globalization for the poor.

Innovations in Securitisation Yearbook 2006 Jan Job de Vries Robbé

2006-01-01 Despite fears that regulators around the world would act to curtail securitisation severely in the aftermath of the collapse of Enron, WorldCom, and Parmalat, the securitisation industry has witnessed what can only be described as relentless innovation. Securitisation remains one of the most important means for financial institutions to diversify their funding, transfer credit risk and manage solvency requirements. This volume, the second in a series focusing on the latest innovations in the global securitisation industry, provides advisers with detailed guidance on key structural and legal issues of innovative securitisations, as well as describing the most recent developments in the accounting and risk-capital treatment of securitisation transactions. The contributors represent a wide range of expert participants in the design, execution, and regulation of securitisation transactions. Among the critical features of contemporary securitisation covered are the following: project finance CLOs; securitisation of equity risk; securitisation of commodity risk through commodity trigger swaps; the convergence of structured credit and securitisation markets; innovation in RMBS: negative equity transactions; innovation in CMBS: A/B structure new markets in Europe, Japan, and Islamic countries; catastrophe risk securitisation; effect of recent US bankruptcy legislation on synthetics; microfinance loan securitisation in emerging markets; public sector securitisation; securitisable intellectual property; application of accounting standards in a rapidly changing environment, and updated analysis of Basel II. The practical perspective of the contributions, combined with the extensive use of case studies of key transactions, should make this volume an invaluable resource for lawyers as well as legal and business academics interested in the very latest developments in the global securitisation markets.
