The Edward G. Robinson Encyclopedia

Robert Beck 2002 Edward G. Robinson, a 1930s cinema icon, had an acting career that spanned over 60 years. After a brush with silent films, he rose to true celebrity status in sound feature films and went on to take part in radio and television performances, then back to Broadway and on the road in live theatre. This work documents Robinson's every known public performance or appearance, listing also co-workers, source material, background and

critical commentary. The entries include feature films, documentaries, short subjects, cartoons, television and radio productions, live theatre presentations, narrations, pageants, and recordings that Robinson was involved with during his professional life. Also included are entries relating to Robinson's life and career, ranging from his art collection to his wives.

Video Production James C Foust 2017-05-12 This popular book introduces readers to the operations underlying video production. It provides thorough coverage of the theory readers need to know, balancing complexity with practical "how-to" information about detailed subjects, and it does so in a concise, conversational style. The authors have incorporated the major changes that have occurred in recent years; further increased the

emphasis on digital, non-linear video production; updated and expanded information on mobile technologies; and added more than 25 new or updated figures. The subtitle remains "disciplines and techniques" because the book's focus continues to be on the fact that students need those foundations in order to be successful in video production, no matter where they may end up. Its affordable, student-friendly price, companion website, and print book and ebook options add to this book's practical nature.

Video Basics (Non-InfoTrac Version) Herbert Zettl 2000-08 Meeting the instructor's needs for a briefer book, this text distills video basics so that they can be covered in a single term. The book moves students from video concepts and processes to production tools and techniques,

and finally, to the production environment (studio or field, inside or outside) and its effects. A more conceptual framework leads the student from the idea (what to create) to the image (how to create) on video.
