Phytochemical Drug Discovery for Central Nervous System

Disorders Chukwuebuka Egbuna 2023-06-23 PHYTOCHEMICAL DRUG DISCOVERY FOR CENTRAL NERVOUS SYSTEM DISORDERS

Understand herbal and plant-based treatments for chronic disorders with this groundbreaking work Due in part to the aging of the global population, disorders of the central nervous system have become an increasingly grave public health concern in recent years. Demand for pharmaceutical treatments has been correspondingly high, but there are many barriers to the successful development of effective synthetic drugs. Phytomedicines, or plant-based and herbal medicines, have proven to be an effective alternative, boasting lower toxicity and cost and higher efficacy, and one that demands greater research and broader-based practitioner knowledge. Phytochemical Drug Discovery for Central Nervous System Disorders meets this demand with a timely, clearly-structured guide. It thorough coverage presents a wide range of phytochemicals with potential as candidates for drug discovery, describing their sources, properties, and therapeutic efficacy. The result is a vital contribution to the ongoing fight against central nervous system (CNS) disorders. Phytochemical Drug Discovery for Central Nervous System Disorders readers will also find: Detailed treatment of CNS-active plant products, neuroprotective chemicals, plant-based nutraceutical products, and more Up-to-date information on FDA-approved drugs and existing plant-based products used to treat CNS disorders An authorial team featuring experts from across the globe Phytochemical Drug Discovery for Central Nervous System Disorders is essential for drug discovery scientists, drug developers, medicinal chemists, biochemists, and any researchers and professionals in the health care or pharmaceutical industries.

Discovery and Development of Anti-inflammatory Agents from Natural Products Goutam Brahmachari 2019-07-11 Discovery and Development of Anti-inflammatory Agents from Natural Products, the latest volume in the Natural Product Drug Discovery series, presents cutting-edge research advances in the field of bioactive natural products and natural drug formulations, with this volume focusing on molecules of natural origin and their synthetic analogues that have the potential to act against the pathogens responsible for inflammatory diseases. All aspects of each are covered, including isolations and structure elucidations, in vitro and in vivo biological activity, synthetic optimization, investigations of pharmacodynamics and kinetics, and the structure-activity relationships of anti-inflammatory natural products. Written by active researchers and

leading experts, this book brings together an overview of current discoveries and trends in this field. It will be a valuable resource for researchers working to discover promising leads for the development of pharmaceuticals in the prevention and treatment of anti-inflammatory diseases. - Features contributions from active researchers and leading experts working in medicinal natural products and herbal formulations - Includes recent, cutting-edge advances on medicinal natural products, along with preventative therapies for different kinds of inflammation-directed diseases - Offers an authoritative source of information on the industrial application of natural products for medicinal purposes

Medicinal Plants of Sabah, North Borneo Christophe Wiart 2024-06-28
Researchers in the field of natural product chemistry and pharmacology focus on discovering new drugs from medicinal plants. The medicinal plants of Sabah (North Borneo), many of which are found in all of Asia and the Pacific, represent a vast array of resources that could be used for the discovery of drugs and the development of cosmetics as well as functional food. No other book focuses on the medicinal plants from this part of the globe in such depth. The author is well known in natural products and this text will appeal to a global audience in presenting the botanical description, chemical constituents, pharmacology, pharmaceutical, cosmetic, and functional food potentials of these plants. Features: Describes in a phylogenetic order the habitats, distributions, botanical descriptions, local names, uses, chemical constituents, pharmacological activities, and toxic effects of more than 250 species of medicinal plants of Sabah Provides a selection of botanical plates of medicinal plants endemic to Sabah, hand-drawn by the author Provides comment sections to invite further research on the topic of the development of drugs, dietary products, and cosmetics from Sabah medicinal plants

Plants that Fight Cancer, Second Edition Spyridon E. Kintzios

2019-06-26 An increasing amount of cancer research is being directed towards the investigation of plant-derived anticancer compounds, many of which have been used in traditional herbal treatments for centuries. *Plants that Fight Cancer* is an up-to-date, extensive review of plant genera and species with documented anti-tumor and anti-leukaemic properties. Following an overview of the disease and the diverse methods of therapy and clinical testing, the book provides a detailed examination of the plants whose compounds are currently used in conventional cancer treatment, the species which show the greatest potential as future candidates, and other species with established anticancer properties. The third section explores each of more than 150 terrestrial plant genera and species, with a review of their traditional uses, mythology, botany, active ingredients, and product applications, along with photographs and illustrations and an analysis of expected results and risks. The text closes with a discussion of algal extracts and isolated metabolites with anticancer activity, a summary of published research for each species, and chemical structures of the most important compounds.

Handbook of Compounds with Anti-inflammatory and Anti-platelet Aggregation Activities Isolated from Plants Rosa Martha Pérez Gutiérrez 2009 This book presents 848 compounds isolated and identified from plants that present anti-inflammatory and antiplatelet aggregation activities. These substances have been classified by chemical groups and each provides the most relevant information of its pharmacological activity, action mechanism, chemical structure, spectroscopic data, and other properties. Chemical structures have been drawn to indicate the stereochemistry. In this handbook the summary of the scientific information of plants that present biological activity and the compounds responsible for these activities is presented, which introduces the reader to the study of medicinal plants and also provides bibliographic references, where a detailed study of its chemistry and pharmacology can be found.

Unity in Diversity and the Standardisation of Clinical Pharmacy Services Elida Zairina 2017-12-22 Unity in Diversity and the

Standardisation of Clinical Pharmacy Services represents the proceedings of the 17th Asian Conference on Clinical Pharmacy (ACCP 2017), held 28–30 July 2017 in Yogyakarta, Indonesia. The primary aim of ACCP 2017 was to bring together experts from all fields of clinical pharmacy to facilitate the discussion and exchange of research ideas and results. The conference provided a forum for the dissemination of knowledge and exchange of experiences. As such, it brought together clinical pharmacy scholars, pharmacy practitioners, policy makers and stakeholders from all areas of pharmacy society and all regions of the world to share their research, knowledge, experiences, concepts, examples of good practice, and critical analysis with their international peers. This year also marks the celebration of 20 years of ACCP. Central themes of the conference and contributed papers were Clinical Pharmacy, Social and Administrative Pharmacy, Pharmacy Education, Pharmacoeconomics, Pharmacoepidemiology, Complementary and Alternative Medicine (CAM) and a number of related topics in the field of Pharmacy.
