

Design Nature And Revolution Toward A Critical Ecology

Art and Pluralism Nigel Whiteley 2012

Through studying Lawrence Alloway's writings, we can trace some of the major shifts in art and cultural values in the 1950s, 1960s and 1970s.

Human Ecology as in [i.e. An] Interdisciplinary Domain Gerald L. Young 1978

The Culture of Nature in the History of Design

Kjetil Fallan 2019-03-26 The Culture of Nature in the History of Design confronts the dilemma caused by design's pertinent yet precarious position in environmental discourse through interdisciplinary conversations about the design of nature and the nature of design.

Demonstrating that the deep entanglements of design and nature have a deeper and broader history than contemporary discourse on sustainable design and ecological design might

imply, this book presents case studies ranging from the eighteenth to the twenty-first century and from Singapore to Mexico. It gathers scholarship on a broad range of fields/practices, from urban planning, landscape architecture, and architecture, to engineering design, industrial design, furniture design and graphic design. From adobe architecture to the atomic bomb, from the bonsai tree to Biosphere 2, from pesticides to photovoltaics, from rust to recycling - the culture of nature permeates the history of design. As an activity and a profession always operating in the borderlands between human and non-human environments, design has always been part of the environmental problem, whilst also being an indispensable part of the solution. The book ventures into domains as diverse as design theory, research, pedagogy,

politics, activism, organizations, exhibitions, and fiction and trade literature to explore how design is constantly making and unmaking the environment and, conversely, how the environment is both making and unmaking design. This book will be of great interest to a range of scholarly fields, from design education and design history to environmental policy and environmental history.

Aynsley 2022-01-13 This innovative volume brings together international design scholars to address the history and present-day status of national and international design organizations, working across design disciplines and located in

countries including Argentina, Turkey, Estonia, Switzerland, Italy, China and the USA. In the second half of the 20th century, many non-governmental organizations were created to address urgent cultural, economic and welfare issues. Design organizations set out to create an international consensus for the future direction of design. This included enhancing communication between professionals, educators and practitioners, raising standards for design, and creating communities of designers across linguistic, national and political borders. Shared needs and agendas were identified and categories of design constantly defined and re-defined, often with overt cultural and political intents. Drawing on an impressive range of original research, archival sources and oral testimony, this volume questions the aims and achievements of national and international design organizations in light of their subsequent histories and their global remits. The Cold War period is central to the book, while many

chapters draw on post-colonial perspectives to interpret how transnational networks and negotiations took place at events and congresses, and through publication.

Design Issues 2019 The first American academic journal to examine design history, theory, and criticism, Design Issues provokes inquiry into the cultural and intellectual issues surrounding design. Regular features include theoretical and critical articles by professional and scholarly contributors, extensive book reviews, illustrations, and a section for reader response. Special issues concentrate on particular themes, such as artificial intelligence, product seminars, design in Asia, and design education.

The editor has gathered together a body of writing in the emerging field of design studies. The contributors argue in different ways for a rethinking of design in the light of its cultural significance and its powerful position in today's society. The collection begins with a discussion of the various expressions of opposition to the modernists' purist approach toward design. Drawing on postmodernist theory and other critical strategies, the writers examine the relations among design, technology, and social organization to show how design has become a complex and multidisciplinary activity. The

second section provides examples of new methods of interpreting and analysing design, ranging from rhetoric and semiotics to phenomenology, demonstrating how meaning is created visually. A final section related to design history shifts its emphasis to ideological frameworks such as capitalism and patriarchy that establish boundaries for the production and use of design.
