In physics, a fluid is a liquid, gas, or other material that may continuously move and deform (flow) under an applied shear stress, or external force. [1] They have zero shear modulus, or, in simpler terms, ... In contrast, liquids deform easily when stressed and do not spring back to their original shape once the force is removed because the atoms are free to slide about and change neighbors—that is, they flow ... The meaning of FLUID is having particles that easily move and change their relative position without a separation of the mass and that easily yield to pressure : capable of flowing. 1 fluid / ' flu:wəd/ adjective Britannica Dictionary definition of FLUID [more fluid; most fluid] 1 : capable of flowing freely like water A situation that is fluid is unstable and is likely to change often. The situation is

extremely fluid and it can be changing from day to day. Fluids flow easily and take on the shape of their containers. All liquids and gases are fluids.
