Apr 28, 2026 · hydroelectric power, electricity produced from generators driven by turbines that convert the potential energy of falling or fast-flowing water into mechanical energy. Hydropower (from Ancient Greek ύδρο -, "water"), also known as water power or water energy, is the use of falling or fast-running water to produce electricity or to power machines. Hydropower, or hydroelectric power, is a renewable source of energy that generates power by using a dam or diversion structure to alter the natural flow of a river or other body of water. At hydropower plants water flows through a pipe, or penstock, then pushes against and turns blades in a turbine that spin to power a generator to produce electricity.
