*Industrial Chemical Separation* Timothy C. Frank 2023-08-07 A fresh new treatment written by industry insiders, this work gives readers a remarkably clear view into the world of chemical separation. The authors review distillation, extraction, adsorption, crystallization, and the use of membranes - providing historical perspective, explaining key features, and offering insights from personal experience. The book is for engineers and chemists with current or future responsibility for chemical separation on a commercial scale - in its design, operation, or improvement - or for anyone wanting to learn more about chemical separation from an industrial point of view. The result is a compelling survey of popular technologies and the profession, one that brings the art and craft of chemical separation to life. Ever wonder how popular separation technologies came about, how a particular process functions, or how mass transfer units differ from theoretical stages? Or perhaps you want some pointers on how to begin solving a separation problem. You will find clear explanations and valuable insights into these and other aspects of industrial practice in this refreshing new survey.

**Basic Calculations for Chemical and Biological Analysis** Bassey J. S. Efiok 2000 Like the 1993 edition, this iteration does not assume that students, lab technicians and scientists have mastered the prerequisite calculation skills for quantitative problems in the chemical/ biomedical sciences. A new chapter focuses on using spreadsheets and laboratory information management systems. Other chapters cover calculations and techniques relevant to reagents, chemical reactions, properties of gases and solutions, pH and buffer preparation, spectrophotometry, enzyme

assays, and radioactivity. Also included are derivations of some key equations, quick reference guides, and an index to the practical examples. Efiok is with the National Heart, Lung, and Blood Institute, National Institutes of Health. Eduok is in the chemistry department at Xavier U. of Louisiana. c. Book News Inc.
