Mastering the Nikon D850 Darrell Young 2018-06-27 *Mastering the Nikon D850* by Darrell Young provides a wealth of experience-based information and insights for owners of the new D850 camera. Darrell is determined to help the user navigate past the confusion that often comes with complex and powerful professional camera equipment.

This book explores the features and capabilities of the camera in a way that far surpasses the user's manual. It guides readers through the camera features with step-by-step setting adjustments; color illustrations; and detailed how, when, and why explanations for each option. Every button, dial, switch, and menu configuration setting is explored in a user-friendly manner, with suggestions for setup according to various shooting styles.

Darrell's friendly and informative writing style allows readers to easily follow directions, while feeling as if a friend dropped in to share his knowledge. The information in this book goes beyond the camera itself and also covers basic photography technique.

Grundlagen der Informationswissenschaft Rainer Kuhlen 2022-12-05 Die 7. Ausgabe der "Grundlagen der praktischen Information und Dokumentation" (Erstausgabe 1972) heißt jetzt: „Grundlagen der Informationswissenschaft“. Der Bezug zur Praxis und zur Ausbildung bleibt erhalten, aber der neue Titel trägt dem Rechnung, dass die wissenschaftliche theoretische Absicherung für alle Bereiche von Wissen und Information, nicht nur in der Fachinformation, sondern auch in den Informationsdiensten des Internet immer wichtiger wird. Für die Grundlagen sind 73 Artikel in 6 Hauptkapiteln vorgesehen. Viele Themen werden zum ersten Mal behandelt, z.B. Information und Emotion, Informationelle Selbstbestimmung, Informationspathologien. Alle Beiträge sind neu verfasst.

Worldwide Guide to Equivalent Nonferrous Metals and Alloys William C. Mack 1996 A companion volume to the *Worldwide Guide to Equivalent Irons and Steels*, this reference book gives you the same complete coverage and identical format for nonferrous metals and alloys. completely updated and expanded from the previous edition, it's an absolute must if you're involved with materials specifying in any way. This comprehensive volume is well-indexed with easy to use cross references that make short work of looking up equivalents for a material specification or designation. It provides valuable composition tables and allows you to compare similar alloys. Tensile properties and product forms are provided when available. If you work in the international marketplace, it's especially ideal for identifying foreign specifications, finding similar alloys and verifying compositional limits. This book is organized by material group or class such as aluminum, copper, lead, magnesium, nickel, tin, titanium, and zinc. Each is further subdivided into groups, then finally into individual alloys. It's a must for metallurgists in design and manufacturing, materials producing companies, distributors and purchasing agents for metallic alloys, design and environmental engineers, academic and institutional libraries and information centres.

Worldwide Guide to Equivalent Nonferrous Metals and Alloys Paul M. Unterweiser 1987 Proceedings of ASM International's 1993 Conference. In this volume, the papers describe real-world applications of putting composites to work. Once thought of as solutions in search of problems, many of these composites are being mainstreamed into commercial applications. Nearly one-third of the book deals with physical and mechanical properties of ceramic matrix composites; other areas covered in detail are processing and characterization of intermetallic matrix composites and metal matrix composites; processing, fabrication and application of polymer matrix composites, fabrications of functionally gradient materials, and processing applications of carbon-carbon composites. Contributing authors hail from university, government and defense research facilities, as well as from aerospace companies across the country. Sustainability in the Textile and Apparel Industries Subramanian Senthilkannan Muthu 2020-03-31 This book is part of a five-volume set that explores sustainability in textile industry practices globally. Case studies are provided that cover the theoretical and practical implications of sustainable textile issues, including environmental footprints of textile manufacturing, consumer behavior, eco-design in clothing and apparels, supply chain sustainability, the chemistry of textile manufacturing, waste management and textile economics. The set will be of interest to researchers, engineers, industrialists, R&D managers and students working in textile chemistry, economics, materials science, and sustainable consumption and production. This volume addresses the technologies and mechanical processes of textile production, and what sustainable methods can be employed to achieve improved safety and environmental health. The book covers sustainable aspects of printing, dyeing, coloration, weaving, knitting, tailoring, surface design and antimicrobial finishing for environmentally friendly textile and apparel products.

Industrial Engineering in the Era of Artificial Intelligence Fethi Calisir 2025-04-26 This book gathers revised and extended versions of the best papers presented at the Global Joint Conference on Industrial Engineering and Its Application Areas (GJCIE 2024), held in/from Antalya, Turkey, on August 7-9, 2024, as a hybrid event. Continuing the tradition of previous volumes, the chapters highlight recent developments in

industrial engineering methods for improving different kinds of business. Special emphasis is given to combined strategies integrating conventional engineering methods with intelligent algorithms and technologies, such as machine learning, artificial intelligence, and blockchain technology, to improve business efficiency, user engagement, and industrial performance.
