**Distributed Computing and Artificial
Intelligence, Volume 2: Special Sessions
18th International Conference** Sara
Rodríguez González 2021-09-09 This book
highlights the latest research on distributed
computing and artificial intelligence. DCAI 2021
is a forum to present applications of innovative
techniques for studying and solving complex
problems in artificial intelligence and computing
areas. The present edition brings together past
experience, current work and promising future
trends associated with distributed computing,
artificial intelligence and their application in
order to provide efficient solutions to real
problems. This year's technical program will
present both high quality and diversity, with
contributions in well-established and evolving
areas of research. Specifically, 55 papers were
submitted to main track and special sessions, by
authors from 24 different countries representing
a truly "wide area network" of research activity.

Moreover, DCAI 2021 Special Sessions have been a very useful tool in order to complement the regular program with new or emerging topics of particular interest to the participating community. The technical program of the Special Sessions of DCAI 2021 has selected 23 papers. We would like to thank all the contributing authors, the members of the Program Committees, the sponsors (IBM, Armundia Group, EurAI, AEPIA, APPIA, CINI, OIT, UGR, HU, SCU, USAL, AIR Institute and UNIVAQ) and the Organizing Committee of the University of Salamanca for their hard and highly valuable work.
