The New Warfare J. Martin Rochester 2016-02-19 This book looks at the evolving relationship between war and international law, examining the complex practical and legal dilemmas posed by the changing nature of war in the contemporary world, whether the traditional rules governing the onset and conduct of hostilities apply anymore, and how they might be adapted to new realities. War, always messy, has become even messier today, with the blurring of interstate, intrastate, and extrastate violence. How can the United States and other countries be expected to fight honourably and observe the existing norms when they often are up against an adversary who recognizes no such obligations? Indeed, how do we even know whether an "armed conflict" is underway when modern wars tend to lack neat beginnings and endings and seem geographically indeterminate, as well? What is the legality of anticipatory self-defense, humanitarian intervention, targeted killings, drones, detention of captured prisoners without POW status, and other controversial practices? These questions are explored through a review of the United Nations Charter, Geneva Conventions, and other regimes and how they have operated in recent conflicts. Through a series of case studies, including the U.S. war on terror and the wars in Afghanistan, Iraq, Gaza, Kosovo, and Congo, the author illustrates the challenges we face today in the ongoing effort to reduce war and, when it occurs, to make it more humane.

Intentions in Great Power Politics Sebastian Rosato 2021-04-20 Why the future of great power politics is likely to resemble its dismal past Can great powers be confident that their peers have benign intentions? States that trust each other can live at peace; those that mistrust each other are doomed to compete for arms and allies and may even go to war. Sebastian Rosato explains that states routinely lack the kind of information they need to be convinced that their rivals mean them no harm. Even in cases that supposedly involved mutual trust—Germany and Russia in the Bismarck era; Britain and the United States during the great rapprochement; France and Germany, and Japan and the United States in the early interwar period; and the Soviet Union and United States at the end of the Cold War—the protagonists mistrusted each other and struggled for advantage. Rosato argues that the ramifications of his argument for U.S.-China relations are profound: the future of great power politics is likely to resemble its dismal past.

Poverty Reduction Strategies in Africa Mike Odey 2017-09-08 A fundamental question about contemporary Africa is why does Africa remain so poor, long after the departure of the European Colonial domination and in the midst of so many natural resources? Poverty Reduction Strategies in Africa provides new understandings of the persistent issue of poverty in Sub-Saharan Africa and makes recommendations for policy frameworks to help African governments alleviate poverty. Each chapter uses case studies to review the old strategies for resolving the problem of poverty in the continent and make the case for new initiatives to address poverty. The contributors focus on practical and day-to-day issues as the best approach to formulate and implement poverty reduction strategies in contemporary Africa. This

book is invaluable reading for students and scholars of African politics and development.

International Relations Keith L. Shimko 2007-07 *International Relations: Perspectives and Controversies* offers an innovative approach to this introductory course. Each of the topical chapters covers an enduring and important debate in the field and examines how political actors or political thinkers explain and defend their different opinions. This format offers the students the chance to understand important issues in International Relations as dynamic struggles over resources and power. Each chapter is structured in four parts. The first part provides a historical overview of the issue, its origins, evolution, and current status. The middle two sections of each chapter map out the opposing or contrasting points of view within the debate. These debates are followed by an evaluation of the merits of each position and the scholarly and political assessment of the situation. The goal of the text is to help students think systematically and critically about international affairs. By distilling the discussion from a variety of viewpoints (rather than simply providing articles by scholars who disagree), the author highlights meaningful distinctions among differing political positions in a way that helps students understand not only the headlines from today and yesterday, but more importantly, those from tomorrow. New! The text has been reorganized to present the discussion of power politics (Chapter 3) before the coverage of war and human nature (Chapter 5). New! Expanded coverage of IOs/NGOs includes the European Union as related to security amidst anarchy (Chapter 3) and the role of Amnesty International and other NGOs in human rights activism (Chapter 10). New! Expanded and updated coverage of the "Clash of Civilizations" in Chapter 12 is found both in the body of the chapter and in the Points of View readings at the end of the chapter. New! Updated Points of View readings, which present primary sources such as official foreign policy statements, government documents, news stories, debate transcripts, and editorials, expand on the chapter discussions. New topics include "Should We Practice Free Trade in Agriculture?"; "Does Foreign Aid

Promote Development?"; "Can a Nuclear Iran be Deterred?"; and "Did 9/11 Reflect a Clash of Civilizations?". Marginal glossary allows students to access key terms without interrupting their reading. End-of-chapter pedagogy includes bulleted chapter summaries, a list of key terms with page numbers, suggestions for further reading, critical-thinking questions, endnotes, and references to relevant web sites.

German Thought and International Relations Robbie Shilliam 2009-03-26 A fundamental question for IR is whether the value system of liberalism can be universalized, or if, in fact, the illiberal reality of international politics systematically rules out such a universalization. The book addresses this issue by focusing on the rise and fall of a specific liberal project supported by influential German intellectuals.

Terrorism in Question Irfan Ahmad 2026-06-15 Terrorism in Question crafts a political anthropology of post-9/11 “new terrorism” by investigating who needs the category of terrorists and offering a global framework to understand anthropology, Islam and terrorism. In contrast to their depiction as antimodern, barbarian and fanatic, this study theorizes “Muslim terrorists” as radical friends of equality and visionaries of an unrecognized ethical politics. Marshalling fieldwork

with media practitioners and refugees, participant observation of counterterrorism conferences in India and Oslo, and encounters with terrorists, it reorients anthropology to elevate its public voice. This book shows how fieldwork, poetry and political theory come together to exemplify decolonized knowledge.
