

The Creative City A Toolkit For Urban Innovators

Advanced Introduction to the Creative City Charles Landry 2019 Written by the leading authority Charles Landry, inventor of the concept of the creative city, this timely book offers an insightful and engaging introduction to the field. Exploring the development of the concept, it discusses the characteristics of cities, the qualities of creativity, the creative and regeneration repertoires and the gentrification dilemma. Other key topics of this definitive work include ambition and creativity, cities and psychology, digitization and the creative bureaucracy.

Seeking Talent for Creative Cities Jill L. Grant 2014-01-01 With the growth of knowledge-based economies, cities across the globe must compete to attract and retain the most talented workers. *Seeking Talent for Creative Cities* offers a comprehensive and insightful analysis of the diverse, dynamic factors that affect cities' ability to achieve this goal. Based on a comparative national study of 16 Canadian cities, this volume systematically evaluates the concerns facing workers operating in a range of creative endeavours. It draws on interviews, surveys, and census data collected over a six-year research program conducted by experts in business, public policy, urban studies, and communications studies to identify the characteristics and features of particular city-regions that influence these workers' mobility and satisfaction. *Seeking Talent for Creative Cities* represents a rigorously empirical test of popular wisdom on the true relationship between urban development and economic competitiveness.

Knowledge Policy Greg Hearn 2008 Knowledge Policy illustrates how the production of knowledge has become central to economic life, and that competitiveness in the 21st century market place is characterized by the ability to translate scientific and technological knowledge into innovation. Does this therefore render cultural and social knowledge unimportant? The contributors attempt to answer this and other important questions using a broader epistemological base for the term 'knowledge'. Policy implications are then developed from this perspective. By examining long-term challenges, this unique book explains what we actually mean by the term 'knowledge' and raises fundamental critiques of existing conceptions of knowledge. It argues that fresh policy thinking is needed not only in more obviously knowledge-intensive sectors, but also across all areas of knowledge production. By way of illustration, the effects of the different dynamics of the knowledge era on defence, health, employment, environment, indigenous and international relations, multiculturalism and urban policy are explored. The book then addresses the enduring question of whether it is possible to produce too much knowledge at the expense of wisdom. Providing a thorough treatment on the meaning, production and application of knowledge, this book will provide a fascinating read for academics, researchers, students, practitioners and policymakers with an interest in public policy and knowledge-based economies.

Creative City as an Urban Development Strategy Suet Leng Khoo 2021-05-21 This book is a pioneering work to position the creative city concept within Malaysian urban development discourse. The chapters are written and systematically sequenced to be all-encompassing and comprehensible to audiences both from the academic and non-academic realms. The nascency of creative city development in Malaysia has motivated the timely exploration of the viability of this strategy for selected Malaysian cities (i.e. Kuala Lumpur, George Town, Ipoh, Johor Bahru). The book also discusses the global discourse on creative city and its critiques. This is followed by an overview of Malaysia's macrolevel socio-economic and political structures as well as national policies to frame the Malaysian creative city narrative. The case study chapters are novel, as each Malaysian city unravels its unique experiences and dissects the way the city responds to the creative city agenda amidst local nuances and idiosyncrasies.

Technology Luisa Calabrese 2009 "The theme of this Architecture Annual is "Realize" ... in just one year the Faculty of Architecture and its staff, in collaboration with internal and external designers, were able to realize quite a lot: an efficient and successful relocation to a temporary tent camp and a completely new faculty on Julianalaan." - preface.

Urban Subversion and the Creative City Oli Mould 2015-03-27 Check out the author's video to find out more about the book:

<https://vimeo.com/124247409> This book provides a comprehensive critique of the current Creative City paradigm, with a capital 'C', and argues for a creative city with a small 'c' via a theoretical exploration of urban subversion. The book argues that the Creative City (with a capital 'C') is a systemic requirement of neoliberal capitalist urban development and part of the wider policy framework of 'creativity' that includes the creative industries and the creative class, and also has inequalities and injustices in-built. The book argues that the Creative City does stimulate creativity, but through a reaction to it, not as part of it. Creative City policies speak of having mechanisms to stimulate individual, collective or civic creativity, yet through a theoretical exploration of urban subversion, the book argues that to be 'truly' creative is to be radically different from those creative practices that the Creative City caters for. Moreover, the book analyses the role that urban subversion and subcultures have in the contemporary city in challenging the dominant political economic hegemony of urban creativity. Creative activities of people from cities all over the world are discussed and critically analysed to highlight how urban creativity has become co-opted for political and economic goals, but through a radical reconceptualisation of what creativity is that includes urban subversion, we can begin to realise a creative city (with a small 'c').

Social Economy of the Metropolis Allen J. Scott 2008-11-20 This book is about the renaissance of cities in the twenty first century and their increasing role as centers of creative economic activity. Allen Scott is one of the world's foremost thinkers on globalization and the economies of modern cities, and in this book presents a concise introduction to his innovative and insightful perspective.

Creativity & Diversity Léon Deben 2006 The cities are changing from centres of production to centres of consumption. Buildings strongly connected with the industrial and productive function of cities are reconstructed and filled up with houses. This is thought to be the domain of the creative class. But how to define creative class, and does it really exist and is it a class and does it prefer to live in the cities? Examples are from divers places like Amsterdam, Berlin, New York and Budapest.
