Ornamental Crops Johan Van Huylenbroeck 2018-07-25 Ornamental plants are economically important worldwide. Both growers and consumers ask continuously for new, improved varieties. Although there are numerous ornamental species, ornamental plant breeding and plant breeding research is mainly limited to some major species. This book focuses on the recent advances and achievements in ornamental plant breeding. The first part of the book focuses on plant traits and breeding techniques that are typical for ornamental plants. Eminent research groups write these general chapters. For plant traits like flower colour or shape, breeding for disease resistance and vase or shelf life are reviewed. General technical plant breeding chapters deal with mutation breeding, polyploidisation, in vitro breeding techniques and new developments in molecular techniques. The second part of the book consists of crop-specific chapters. Here all economically major ornamental species are handled together with selected representative species from different plant groups (cut flowers, pot plants, woody ornamental plants). In these crop-specific chapters, the main focus is on recent scientific achievements over the last decade.

Sustainable Agriculture Reviews 27 Eric Lichtfouse 2018-05-08 This book deals with a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children. It is a discipline that addresses current issues: climate change, increasing food and fuel prices, poor-nation starvation, rich-nation obesity, water pollution, soil erosion, fertility loss, pest control and biodiversity depletion. This series gathers review articles that analyze current agricultural issues and knowledge, then proposes alternative solutions.

The Global Floriculture Industry Khalid Rehman Hakeem 2020-11-17 This new volume presents some of the latest research trends and areas of improvement to benefit the floriculture industry and to understand its

future directions and prospects. The research addresses the global floriculture industry's shift from a traditional to a commercial focus. The global economy has spurred entrepreneurs to focus on the growing trend of export-oriented floriculture under controlled climatic conditions. The volume also looks at the role of plants in stabilizing the environment and the use of scientific knowledge through research that has changed the perspective of modern floriculture. This new book is a valuable compilation of the latest research work and areas of improvement in floriculture today. Key features: Provides an overview of the global floriculture industry Looks at the role of bulbous ornamentals Considers enhancing consumer-preferred traits in floriculture crops through genetic manipulation Discusses using ornamental plants to stabilize the environment

Airline Efficiency John D. Bitzan 2016-06-10 An efficient air transport system is critical to countries attaining and sustaining healthy economies in an increasingly interconnected world economy. This volume 5 of *Advances in Airline Economics* includes literature surveys and original empirical research examining airline efficiency in the twenty first century.

Technology Meets Flowers Eric van Heck 2021-06-30 Why do the Dutch continue to play a central role in the global production, sales, and distribution of flowers? What are the origin and history of the bulb and flower industry in the Netherlands? How are Artificial Intelligence (AI), complex algorithms, and modern distribution systems ensuring that fresh flowers reach their destination on time? This very entertaining and informative book introduces readers to the global flower business, and highlights the surprising factors that helped the Dutch become global leaders on the flower markets. The book reveals the complexity of the flower markets in terms of their ability to produce, transport, and deliver fresh flowers on a global scale. In addition, it explores how information

advantage is created by blending business with technology, from robotized glasshouses to the use of AI-driven algorithms for flower production and distribution. In closing, the book presents lessons learned regarding the circular and digital transformation of the high-speed flower business and markets in order to deliver sustainable value for customers. Combining the light beauty of flowers with the harsh language of the digital universe is a masterfully executed task in this book, organized as a bouquet of algorithms, data science, and digital platforms. Mandatory reading for all those interested in the flower business as well as for those who want to know more about the perfume emanating from digital systems. Eduardo Diniz Professor and Head of the Technology and Data Science Department, Escola de Administração de Empresas de São Paulo, Fundação Getulio Vargas, São Paulo, Brazil This unique book leads you through the bulb fields and auctions of the Netherlands, through history, logistics, auction design, and Internet technology, to draw lessons in business management from the study of flowers. With beautiful illustrations. A tour de force. John Kay Economist, Author of Radical Uncertainty and Greed is Dead, and Fellow, St. John's College, University of Oxford, Oxford, United Kingdom If you want to understand the impact of information and technology on a fascinating industry, this book is a must-read. The author explains in a highly intriguing way how innovations propelled the flower industry from the sixteenth century till today. Whether you are working in the flower industry, a business student, academic, or just intrigued by the business behind flowers, you will enjoy this book! Martin Mocker Professor of Information Systems, ESB Business School, Reutlingen University, Reutlingen, Germany. Research Affiliate, MIT Sloan Center for Information Systems Research, Cambridge, USA

The Oxford Handbook of the Ethiopian Economy Fantu Cheru 2019-01-10 From a war-torn and famine-plagued country at the beginning of the 1990s, Ethiopia is today emerging as one of the fastest-growing economies in Africa. Growth in Ethiopia has surpassed that of every other sub-Saharan country over the past decade and is forecast by the International Monetary Fund to exceed 8 percent over the next two

years. The government has set its eyes on transforming the country into a middle-income country by 2025, and into a leading manufacturing hub in Africa. The Oxford Handbook of the Ethiopian Economy studies this country's unique model of development, where the state plays a central role, and where a successful industrialization drive has challenged the long-held erroneous assumption that industrial policy will never work in poor African countries. While much of the volume is focused on post-1991 economic development policy and strategy, the analysis is set against the background of the long history of Ethiopia, and more specifically on the Imperial period that ended in 1974, the socialist development experiment of the Derg regime between 1974 and 1991, and the policies and strategies of the current EPRDF government that assumed power in 1991. Including a range of contributions from both academic and professional standpoints, this volume is a key reference work on the economy of Ethiopia.

Integrated Pest and Disease Management in Greenhouse Crops

Maria Lodovica Gullino 2020-03-17 This book represents a new, completely updated, version of a book edited by two of the current editors, published with Springer in 1999. It covers pest and disease management of greenhouse crops, providing readers the basic strategies and tactics of integrated control together with its implementation in practice, with case studies with selected crops. The diversity of editors and authors provides readers a complete picture of the world situation of IPM in greenhouse crops.
