Structural Equation Modeling Approaches to E-Service Adoption Akgül, Yakup

2019-04-19 With the modernization of services offered through the internet, many traditional face-to-face services have adopted new e-service phenomena. Especially prevalent among the younger generations, this change in service has promoted many industries to rethink how to best reach their consumers using modern technology. Structural Equation Modeling Approaches to E-Service Adoption is a pivotal reference source that aims to share the latest empirical research findings within technology acceptance, information systems, information technology, human-computer interaction, and management information systems. While highlighting topics such as e-commerce, internet banking, and

technology acceptance, this publication explores the understanding of today's e-services in a dynamic and complex environment, as well as the methods within the field of information systems and information technologies. This book is ideally designed for academics, students, managers, and scholars interested in the up-and-coming research surrounding the field of information technology.

The Routledge Handbook of Accounting Information Systems Erik Strauss 2022-11-25

The Routledge Handbook of Accounting Information Systems is a prestige reference work offering a comprehensive overview of the state of current knowledge and emerging scholarship in the discipline of AIS. The pace of technological-driven change is rapid, and this revised edition provides a deeper focus on the technical underpinnings and organisational consequences of accounting information systems. It has been updated to capture the changes in technology since the previous edition. It now includes chapters and scholarly thought on artificial intelligence, predictive analytics and data visualisation, among others. Contributions from an international cast of authors provide a balanced overview of established and developing themes, identifying issues and discussing relevant debates. The chapters are analytical and engaging. Many chapters include cases or examples, and some provide additional resources for readers. The chapters also provide a reflection on where the

research agenda is likely to advance in the future. This is a complete and indispensable guide for students and researchers in accounting and accounting information systems, academics and students seeking convenient access to an unfamiliar area, as well as established researchers seeking a single repository on the current debates and literature in the field.

Research on Professional Responsibility and Ethics in Accounting Cynthia Jeffrey 2010-01-20
Presents the research and cases that focus on the professional responsibilities of accountants and how they deal with the ethical issues they face. This title features articles on a broad range of important topics, including professionalism, social responsibility, ethical judgment, and accountability.

American Employers 2008 Jack W. Plunkett 2008-03 Covers employers of various types from 100 to 2,500 employees in size (while the main volume covers companies of 2,500 or more employees). This book contains profiles of companies that are of vital importance to job-seekers of various types. It also enables readers to compare the growth potential and benefit plans of large employers.

Accounting Information Systems Stephen A. Moscové 1987 This textbook for business undergraduates integrates accounting principles and concepts into today's business information systems. This edition has been revised to include an extensive discussion of decision support systems and a new chapter on coding and flowcharting. There are many case studies and sample problems, and the computer supplement has been expanded to reflect the most recent developments in computer hardware and software. The text employs a prototype organization to examine accounting information

systems subject by subject, including management concepts in relation to accounting information systems, the flow of data within an information system, internal control systems and a systems life-cycle analysis.
