florescence of our species.

Modern human population

dynamics, which involved

multiple population expansions,

dispersals, contractions and

extinctions, played a central

role in our species'

evolutionary trajectory. So far, the demographic processes - modern human population sizes, distributions and movements - that occurred within Africa during this critical period have been consistently under-addressed. The authors of this volume aim at (1) examining the impact of this glacial-interglacial- glacial cycle on human group sizes, movements and distributions throughout Africa; (2) investigating the macro- and micro-evolutionary processes underpinning our species' anatomical and behavioral evolution; and (3) setting an agenda whereby Africa can benefit from, and eventually contribute to, the increasingly sophisticated theoretical and methodological palaeodemographic frameworks developed on other continents.

Mine Planning and Equipment Selection 1997 R. Farana 2020-12-17 Presenting current and emerging technologies in the field of mine planning and equipment, this volume also covers control and automation

for surface and underground mining. A wide range of papers from professionals in Europe, South America, Africa and Australia are featured.

*Living on a Time Bomb* Svenja Schöneich 2022-10-14

Providing a holistic understanding of extensive oil extraction in rural Mexico, this book focuses on a campesino community, where oil extraction is deeply inscribed into the daily lives of the community members. The book shows how oil shapes the space where it is extracted in every aspect and produces multiple uncertainties. The community members express these uncertainties using the metaphor of the time bomb. The book shows how they find ways to "live off the time bomb" by using mechanisms of short-term coping and long-term adaptation and thus, developing the capability to determine their lives despite the ever-changing challenges.
