Secrets of the Millionaire Mind T. Harv Eker
 2009-10-13 #1 New York Times, Wall Street Journal, and USA Today Bestseller! Secrets of the Millionaire Mind reveals the missing link between wanting success and achieving it! Have you ever wondered why some people seem to get rich easily, while others are destined for a life of financial struggle? Is the difference found in their education, intelligence, skills, timing, work habits, contacts, luck, or their choice of jobs, businesses, or investments? The shocking answer is: None of the above! In his groundbreaking *Secrets of the Millionaire Mind*, T. Harv Eker states: "Give me five minutes, and I can predict your financial future for the rest of your life!" Eker does this by identifying your "money and success blueprint." We all have a personal money blueprint ingrained in our subconscious minds, and it is this blueprint, more than anything, that will determine our financial lives. You can know everything about marketing, sales, negotiations, stocks, real estate, and the world of finance, but if your money blueprint is not set for a high level of success, you will never have a lot of money—and if somehow you do, you will most likely lose it! The good news is that now you can actually reset your money blueprint to create natural and automatic success. *Secrets of the Millionaire Mind* is two books in one. Part I explains how your money blueprint works. Through Eker's rare combination of street smarts, humor, and heart, you will learn how your childhood influences have shaped your financial destiny. You will also learn how to identify your own money blueprint and "revise" it to not only create success but, more important, to keep and continually grow it. In Part II you will be introduced to seventeen "Wealth Files," which describe exactly how rich people think and act differently than most poor and middle-class people. Each Wealth File includes action steps for you to practice in the real world in order to dramatically increase your income and accumulate wealth. If you are not doing as well financially as you would like, you will have to change your money blueprint. Unfortunately your current money blueprint will tend to stay with you for the rest of your life, unless you identify and revise it, and that's exactly what you

will do with the help of this extraordinary book. According to T. Harv Eker, it's simple. If you think like rich people think and do what rich people do, chances are you'll get rich too!

 ☐☐Buy the Paperback Version of this Book and get the Kindle Book version for FREE ☐☐ If you want to find out how 1 percent of the population thinks, reaches their goals and creates wealth, keep reading.. The truth is that most people have a completely wrong mindset, they don't think like wealthy people and try to achieve their goals in a completely wrong way. Most people have mentors who have never been millionaires or wealthy, so they don't know what the right mindset is, neither how to achieve their goals and what is the right attitude towards money. Clearly, in order to achieve the desired goals and wealth, we need to approach a new psychology, change mindset and commit in a completely different way which, unfortunately no one could teach us in the past. The purpose of this book is to make you understand what is the right mindset, how to change it and how to reach the goals that your previous mentality has not allowed you to reach so far. You will learn:
 Where ordinary people are going wrong
 Why most people are wrong
 Right and wrong money management
 How the mind works
 How to change your mindset
 How to create your goals
 How to act to achieve your monetary goals and get financial stability.
The Wealthy Mind is not just a story or a trivial theoretical book, but a real and proper guide that will allow you to see where and why ordinary people make mistakes. You will be able to understand how the most successful and rich people think and act, how to change and approach a new mindset, and, above all how to use your mind in order to reach your goals and gain financial stability.
