*Case Studies for Inclusion in Education* Keith Storey 2020-07-20 This book responds to a critical need for highly qualified personnel who will become exemplary professionals in inclusive education for students with disabilities because of their advanced knowledge, skills, and experiences in working with students with varying disabilities. It will serve as a guide for teachers, teachers in training, and other service providers to engage in understanding and analyzing inclusion to help prepare them for how they can best teach and serve all students, including those with a disability. These case studies provide a guide for analyzing real life situations and will help readers to become a better teacher and service provider. Too often the inclusion planning process only looks at a few areas and not a comprehensive analysis of skill and support needs. This book provides the framework for analyzing these areas. It is written in a non-technical style and provides case study examples and guides for assisting readers in analyzing and understanding appropriate supports and interventions for inclusion. Readers will appreciate the provision of a system for teachers, teachers in training, and others (school psychologists, behavior specialists, classroom assistants, etc.) to analyze inclusion and to understand how supports and instruction can be used to best educate students with disabilities. The exploration of inclusion needs to be situated within a context, which, in this book, is the use of the case studies for understanding and analysis. An advantage of this book is that universities, school districts, and organizations preparing teachers can easily use it in courses or trainings that address inclusive education as the case studies comprehensively cover methodology and issues that represent best practices and evidence-based methods in this area. Those who are already teachers or other support providers will find the case studies to be practical and helpful for increasing their skills in applied settings.

Bateman 2019-01-12 Tremendous changes have occurred over the past decade in the provision of services to students with disabilities. Federal mandates continue to define requirements for a free appropriate public education (FAPE) in the least restrictive environment. Additionally, there has been an increase in the number of lawsuits filed against school districts regarding the provision of educational services for students with disabilities. Case studies are a helpful way to understand these difficult issues. The case studies presented here are actual students eligible for special education and related services. The case studies are represented not to tell districts and parents that this is the only way questions about special education law can be answered, but to provide likely answers along with commentary for analysis. The cases were developed to help new (and experienced) special education leaders and supervisors survive the pressures of working with students with disabilities while working to provide appropriate services and prevent litigation.
